THEY ALSO SERVE?

At the recent meeting of the board of governors of the Medical Alumni Association, one of the three bright and well-spoken medical students present for the first time asked a little group of alumni standing by the bar what is the purpose of the board of governors. At that point, before the meeting had begun, it looked like nothing more than an eating and drinking club. But the student was told that the group had a number of purposes: mobilizing support for the School in the community, helping raise funds, advising the dean about student clerkship opportunities in the offices of private physicians, helping the School acquaint legislators with problems in medical education. And, most important, helping keep alumni in contact with their *alma mater*, its faculty and students, able to make suggestions and give support in a personal way. All these rather nebulous (except the fundraising) functions became crystallized in my mind later that evening when, after the dining was done and the routine business attended to, we listened to Dean Bennett report on the immediate concerns of the School of Medicine. Increasing the class size, persuading Congress to continue funding basic research, developing new methods of bringing the best of health care to the New York University and Bellevue community; these were what the dean wanted us to know about, to help him with.

For many alumni, the School is the institution which started them on a meaningful career, among them many who have contributed money over the years. For others, it is a place they want to know about through articles in the newspapers and in the *Medical Quarterly*. And perhaps for a smaller number, it is a place which offers a real chance to help influence the course of medical education and medical practice in the future.

Time and distance are no bars to involvement: a letter to the dean offering support, the organization of a little group of alumni in your own community to discuss problems and offer suggestions. Anything is possible. We put ourselves in the category we imagine we ought to belong to. There may be better ways of serving than standing and waiting.

BASIC SCIENCES EMPHASIZED AT FIRST DAY EXERCISES

The 171 members of the Class of 1977—chosen from 4,200 applicants—came together on September 6 and 7 for First Day Exercises. They were assured by upper classmen and faculty members and deans that they possessed the necessary attributes to become good physicians. But they were also given strong advice on how to achieve that goal.

Dr. Ivan L. Bennett, Jr., provost and dean of the Medical Center, said: "Medicine is really a jealous mistress, and the purpose of your being here in medical school is to become a good physician, not a sociologist or an economist. That doesn't mean that you can't take an interest in the sociology or the economics of medicine . . . (but) it's our hope that you will concentrate a majority of your attention on getting through the curriculum and preparing yourself to become a physician. . . . The purpose of teaching you these basic sciences is to make sure not that you know all the facts, but that you understand the principles that underlie them and that you are acquiring an ability to apply these principles to the solution of the problems."

Dr. Saul J. Farber, Nathan Friedman Professor and chairman of the department of medicine, also discussed the process of studying the basic sciences, noting that: "rapidly one acquires the

necessary information on which to build an immense structure of old that is good and not so good, and new that is good and not so good. There is a constant equilibrium of acquisition and discarding. But the arrow should always be heavily directed toward acquisition." The goal, Dr. Farber said, is healing and relieving by understanding.

Erythroblastosis Fetalis

Then, the class members were treated to a detailed presentation of the nature and clinical history of erythroblastosis fetalis. Starting with the first description of the disease by Hippocrates in 400 B.C., it dealt with the gradual unveiling of the causes of neonatal jaundice and with the current search for improved methods of precisely identifying unborn children at risk and therefore candidates for intrauterine transfusions. The composite basic and clinical science description was offered by Dr. Gordon W. Douglas, professor and chairman of the department of obstetrics and gynecology, who himself has made important scientific contributions to the therapy of the disease, Dr. Sanford Cohen, associate professor of pediatrics and pharmacology, and Dr. Bruce Young, assistant professor of obstetrics and gynecology.

Cushing's Syndrome

A second presentation dealt with Cushing's syndrome, with Dr. Manfred Blum, assistant professor of clinical medicine, Dr. Robert W. Chambers, professor of biochemistry and Dr. S. Arthur Localio, professor of surgery, presenting aspects of the disease. The three men emphasized the importance of a knowledge of the complex metabolic pathways and sites of origin of the adrenal hormones and their physiological effects for a differential diagnosis of pituitary tumors, tumors of the adrenal cortex and adrenal hyperplasia. This presentation, as did the first, stimulated a number of challenging questions from the students.

Upper Classmen Participate

While the formal program was devoted to a heavy foretaste of the intellectual challenges to come, the portion of the program which was given over to the upper classmen offered an equally concentrated dose of information about life at NYU School of Medicine. Among the obviously deeply appreciated speakers was Mark D. Grebenau, M.D.-Ph.D. student, who advised the first-year class members to set aside the competitive spirit of undergraduate school and work to help each other succeed. At a welcoming luncheon, a structure for sharing was immediately established when the students were assigned to clinical correlation groups of five or six led by one or two fourth-year men and women and one or two faculty members. Several of the upper classmen noted that these groups had formed for them strong bonds which are continuing throughout medical school.

Elliot E. Abbey, of the Class of 1975, president of the Student Council, addressed the class on September 13. He urged the new students to attend Student Council meetings and he outlined the procedures for electing class officers and the class representative on the Council. Mr. Abbey also detailed the provisions of the New York State drug abuse law. Other students described the plans for a lecture transcript service which is intended to facilitate assimilation of the basic medical science information which, as the students were repeatedly reminded, is generally regarded as the foundation of medical education.

Upper class students presented their views on how to get along at medical school during an afternoon program on September 6.

AMERICAN GRADUATES OF FOREIGN MEDICAL SCHOOLS GET CLINICAL TRAINING IN NYU-BROOKDALE PROGRAM

American college graduates with pre-med majors, unable to find places in medical schools in this country, are attending foreign medical schools in increasing numbers. Most go either to the University of Guadalajara in Mexico, or the University of Bologna in Italy. The hurdles are many: they must become fluent in a new language, they must accept a long period of separation from family and friends. For all but a few, getting back into the mainstream of American medical practice has been extremely difficult. Although the foreign schools give them a strong technical background in basic medical subjects, they offer little in the way of practical experience.

Most of the young men and women who have gone abroad for their medical education wish ultimately to return and practice in this country. The great shortage of physicians here has generated increasing pressure for improving the system of bringing American-born foreign medical school graduates into approved internship and residency programs in this country.

Fifth Pathway

A program established in 1971 by the American Medical Association called the "Fifth Pathway" has the approval of the Association of American Medical Colleges, the American Hospital Association and of a number of the states and the Federal Government. It gives an American college graduate who goes to a foreign medical school the opportunity to return home and complete his education in a major teaching facility. The returning student must take an examination covering basic material such as the Federal Licensing Exam (FLEX) or the National Boards or the Educational Council for Foreign Medical Graduates (ECFMG) exam, and he must spend a year in supervised clinical training.

For New York University Medical Center, the opportunity to help increase the number of well-trained physicians has dovetailed perfectly with its wish to give new dimensions to its ties with the Brookdale Hospital Medical Center in Brooklyn. Whereas the School has extended itself to its fullest reach by ex-

panding its entering class from 135 to 150 to a current 173 over the space of five years, it did find it possible to also encourage clinical training of foreign medical graduates at Brookdale. From Brookdale's point of view, there was an opportunity to train future house staff members, who, once they have completed a well-supervised academic and practical training program, would be ready for internships at the hospital. In fact, nine of the ten members of the last group of students elected to serve their internship at Brookdale.

Dr. Kahn Is Director

Under the guidance of Dr. Alvin Kahn, associate professor of clinical medicine and assistant dean, a program was set up at Brookdale which is similar to the third year of medical school. Ten foreign-trained physicians have entered the program over each of the past two years. They pay no tuition—but receive no salary or stipend. Their year of clinical clerkship includes rotations through each of the five key clinical departments: medicine, surgery, pediatrics, psychiatry and obstetrics and gynecology. But before they begin seeing patients they spend six weeks in a didactic learning experience in which they learn to take a history of the patient's illness and do proficient physical diagnoses.

When they begin to assist with the management of the patients, as is true for any group of third-year medical students, many are all thumbs. They are generally not quite as fast to learn as the usual early-blooming NYU medical student who has gotten consistently high marks in high school and college and on the Medical College Admissions Test. Nonetheless, the same strong drive that got them through Guadalajara or Bologna, serves them well in ultimately developing experience and clinical excellence. With the help of some very dedicated work on the part of the attending physicians and residents who supervise them, they learn their medical science and they become good physicians.

Dr. Kahn notes that "medicine is difficult, but not so difficult that it requires a straight 'A' student to master it. 'B'

or even 'C' students can become top notch physicians, once they overcome their learning difficulties and begin to apply themselves efficiently to work assignments."

Considerable Responsibility

According to Dr. Kahn: "Universities and hospitals considering the establishment of a Fifth Pathway program are cautioned that the responsibility is considerable. The students must never be used to bolster a weak intern staff since this would defeat the basic concept behind return to the United States—to get good supervision. The house staff and teaching faculty in most instances must increase in number to handle a situation that literally converts a community hospital into a medical school annex."

Through its Fifth Pathway program in association with Brookdale, NYU School of Medicine is providing young physicians who have graduated from foreign medical schools the chance to get the strong clinical training they need to become fine physicians.

Fifth Pathway students are introduced to the clinical measurement of blood counts and cell indices as performed by the Coulter-S in Brookdale hematology lab. Dr. Alvin Kahn (standing at center with hand on machine) is director of the NYU-Brookdale Program.

THE CURRENT STATUS OF SEX EDUCATION IN MEDICAL SCHOOLS

Harold I. Lief '42

As director of the Center for the Study of Sex Education in Medicine at the University of Pennsylvania, I have been asked by the editor of *Medical Quarterly* to prepare a brief account of the development of sex education in medical schools during the last decade. At the same time, since I am also a graduate of NYU, he has asked me to make it into a sort of personal or semi-autobiographical statement.

To place the current status of sex education in medicine in an historical perspective, in 1960 when I first became aware of the deficiencies in medical sex education, only three medical schools had any sort of formal course material in human sexuality for medical students. These were The University of Pennsylvania, where in 1952 Dr. Emily Mudd had started an elective for senior medical students (which most of them took), Washington University in St. Louis, where Dr. William Masters gave six lectures to second-year medical students, and the Bowman-Gray School of Medicine in Winston-Salem, where Dr. Frank Lock, professor of obstetrics and gynecology, had not only pioneered courses for students, but had established a weekly seminar for OBS/GYN residents and their wives. At NYU, only the courage of the late Sophia Kleegman in the department of obstetrics and gynecology prevented the almost complete neglect of the subject. Every year she gave a highly popular lecture on sexual function and dysfunction. In the early 1930's, because of her open advocacy of birth control, she almost lost her status as attending physician at Bellevue Hospital. (You may recall that it was not until 1937 that the American Medical Association officially endorsed contraception.)

Emotional Adjustment of Students

How did I become interested in this area of medical education? Beginning in 1957, under a grant from the Commonwealth Fund while I was still at Tulane University, I had been investigating the psychological and emotional adjustments and adaptations of medical students. A team of researchers under my direction had been studying a host of variables, among which was included sexual attitudes and behavior of medical students. Knowing of this, Dr. Mary Calderone, now executive director of SIECUS, but at that time medical director of Planned Parenthood, who was preparing a new textbook, "Manual of Contraceptive Practice," asked me in 1960 to prepare a chapter on "Sexual Attitudes and Behavior of Medical Students and their Implications for Family Planning." When I also presented this material at some national meetings, it attracted a great deal of interest and, to my astonishment, I became a "sex expert" overnight. It took me the better part of the next decade to begin to live up to the reputation which had suddenly descended upon me. The professional response to my pub-

(Continued on Page 6)

SEX EDUCATION AT NEW YORK UNIVERSITY SCHOOL OF MEDICINE

by Charles H. Debrovner '60

"How is your appetite? Are you sleeping well? Do you have any sexual problems?" This type of review of systems is undoubtedly heard very infrequently. Only a minute fraction of physicians take any sort of a sexual history. Others do not even provide the proper climate so that spontaneous presentation of sexual problems appears to be welcome. In some cases, this is due to the fact that the elicitation and evaluation of these problems, not to mention the therapy, represents a time-consuming process which does not fit in well with a busy office schedule. More frequently, however, it is probably because the physician does not wish to open the Pandora's Box of problems, questions, and answers for which he has had no training. This is often an area in which he must rely upon his own experience, which may be quite limited, and which may provide little insight into the patient's difficulty.

Dr. Kleegman Began Series

Medical schools have only recently become aware of this need and have undertaken to include training in human sexuality in their curricula. New York University was fortunate to have on its faculty the late Sophia J. Kleegman, who, for many years, delivered a lecture in the area of human sexuality to the third-year class. This lecture was always a highlight in the year's events and provided some background for the information then available.

When Dr. Kleegman first began this lecture series many years ago, she relied on her long clinical experience and the teachings of her mentor, Dr. Dickenson, who was one of the pioneers in the investigation of human sexuality. More recently, through the work of Kinsey, and Masters and Johnson, human sexuality has become a "respectable" area for scientific research and a body of knowledge is now being developed which has behind it objective laboratory data. The changing role of women in our society has also been an important factor. Along with the drive toward economic and social equality has come an increase in sexual expectations and a need for re-evaluating many traditional concepts that were primarily put forth by male teachers and investigators.

Five years ago, the department of obstetrics and gynecology offered, for the first time, an elective entitled, "Psychological and Sexual Problems of Women." This elective offered to 25 students in the second year, with the full cooperation of the department of psychiatry, had two purposes: to increase knowledge of human sexuality, and to augment the psychopathology-focused teachings of the department of psychiatry, to include the way that "normal" people reacted to various stressful situations occurring

(Continued on Page 7)

Dr. Debrovner is clinical associate professor of obstetrics and gynecology at the School of Medicine.

STATUS OF SEX EDUCATION

(Continued from Page 4)

lications was such that it pushed me more and more in the direction of specializing in sexual education in medicine and in sex therapy and research. I quickly became convinced that sexual therapy had to be conducted in the context of marital therapy, so that my interest in marital therapy or marriage counseling was a natural development.

At the suggestion of Frank Lock, whose interests paralleled mine, the two of us together with Clark Vincent, a sociologist at Bowman-Gray, applied to the Commonwealth Fund for support of a national committee dealing with human sexuality, marriage, and the family. With this eventually accomplished, we set up a committee with representatives from the Association of American Medical Colleges and the AMA, which also included some of the leading medical educators in the country. This committee met a number of times in the mid-60's and recommended the establishment of a center, the aim of which would be to develop or augment courses in human sexuality in American medical schools. This is how the Center for the Study of Sex Education in Medicine became established under my direction at The University of Pennsylvania in 1968. Having been offered, in 1967, the directorship of the division of family study which included the Marriage Council of Philadelphia, I had eagerly accepted because I saw this as a structure through which these various facets of medical education and practice could be substantially augmented.

In the meantime I had become a member of the first board of SIECUS (The Sex Information and Education Council of the United States) and eventually became its president. This led to a broadening interest in sex education in schools and the community, as well as for the medical profession.

Need Now Recognized

Almost every physician now recognizes the need for training in this area for three reasons: (1) the frequency of sexual problems in medical practice; (2) their importance to the patient and his family; and (3) the demand by patients that their doctors be competent in managing these problems.

Since the role of the sex and marriage counselor is inevitable for most physicians and since most physicians are not well equipped to carry out these functions, the Center sought as its main activities the following: (1) to provide a clearinghouse for the exchange of information about existing curricula or those being planned in medical schools; (2) to implement research and evaluation of training in this field, particularly in reference to the impact upon students' judgment in recognizing and managing sexual or marital problems; (3) to offer consultation to medical schools concerning curricula designs and the development of teaching techniques.

The Center has held seven regional workshops attended by representatives from more than 90 medical schools. A national conference for invited participants reviewing the entire field of sex education in medicine is planned for April 1974.

The staff of the Center has developed the Sex Knowledge and Attitude Test (SKAT) which has been given to over

14,000 people including more than 8,000 medical students from more than 50 medical schools. This has provided us with a body of information about sexual attitudes, knowledge, and personal experience as well as demographic data we are now analyzing and collating for publication. In addition, the Center has developed a training film dealing with the teaching of sex education to medical students and three films concerned with counseling.

The staff has consulted with dozens of medical schools around the country and has, in addition, participated in seminars with a variety of professional organizations in almost every field of medicine. We have also helped the American Medical Association prepare its recent book, "Human Sexuality."

We are delighted that the World Health Organization has now seen fit to move into this area and, after a planning conference in 1972, a more formal conference on the sex education of the health professional is planned for February 1974, in Geneva.

Affective Learning

An interesting facet of education in this area is the need for "affective" learning. Like other people, almost every medical student has strong feelings about human sexuality; unlike other people, he has to help patients with sexual problems. Often these strong feelings—anxiety, guilt, curiosity, anger, and the like—prevent him from taking an adequate sexual history or carrying on an effective interview, or doing a pelvic, genital, or rectal examination. Studies by Mudd and Siegel, Woods and Natterson, and our own studies at Tulane made it clear that such anxieties are ubiquitous among students and that these interfere with appropriate and effective counseling. To help students manage these feelings, new techniques of affective learning have to exist side by side with cognitive learning. Techniques involve "consensual validation," "confrontation," and "implosion." A more detailed discussion of these teachings of affective learning is contained in a recent paper (Lief, 1973). It is clear that the medical student must become more aware of his own sexual attitudes and feelings, and that, after first having been "sensitized" to them, he then has to become "desensitized." Desensitization will serve to create the comfort with human sexuality that is the most significant factor in becoming an effective interviewer and counselor of patients with sexual problems. Comfort in this area also allows one to more effectively integrate new information about human sexuality. The tie-in between affective and cognitive learning is an area for educational research, in which we are deeply interested. Affective learning also has significant implications in other areas of medical education.

In addition, studies of the outcome of specific programs of education must be carried out so that we know which programs are effective and, indeed, how they affect the management of patients. We know that sexual attitudes and knowledge can be influenced by teaching and that these persist for some months, but at this time we have no real assurance that our educational programs are modifying the way in which medical students and physicians actually deal with their patients. These are the areas of research to which the Center is committed.

Recognizing the need for coordinating their activities, medical schools along the eastern seaboard have recently formed a coordinating group so that information on resources and experiences can be shared. At NYU for example, one of the key elements is the need to integrate training in human sexuality with family planning—a need which, actually, is manifest throughout the country. In my opinion, to have these two areas of medical education separated is absurd. All aspects of family planning, including contraceptive counseling, are dependent on the recognition of the interrelations among family planning and sexual and marital relationships.

The appropriate training of medical students and physicians in the identification and management of sexual problems in medical practice has been a satisfying aspect of my own career. I recognize that these problems are, in the words of Quigg Newton, president of the Commonwealth Fund, “among the most sensitive and anguishing that patients bring to their physicians, and at the same time represent an area in which medical counseling impinges deeply on individual and family behavior and values. Thus, medical intervention is often critical to the patient’s entire well-being, and to that of the patient’s family.”

SEX EDUCATION AT NYU

(Continued from Page 5)

throughout life. These situations are often related to events in the sexual and reproductive areas.

A brief look at the topics included in the original elective will provide an idea as to the kinds of problems we hoped to touch upon. An initial lecture was given in sexual and reproductive physiology and might have been entitled, “The Ages of Women.” It gave an overall approach to the kinds of problems which are most often encountered at various stages of life. This was followed by a session on the premarital interview and was conducted by a gynecologist, a psychologist, and a minister. The following week, psychological factors in the choice of contraceptive method were discussed. This included a review of the physiology of contraception as well as an approach to the various non-physiologic factors that played a role in contraceptive choice, especially those involved in the interaction within the couple and the role that the choice of contraceptive technique might play in the give and take of their sexual relationship.

Next, the problems of the unwed mother were studied. At this time abortions were not yet legal and the problem of out-of-wedlock pregnancy was far more important than it is today. A visit was made to the Home for Unwed Mothers at Booth Memorial Hospital and several of the women as well as the staff were interviewed by our group.

This was followed by a session on medical, legal and psychological aspects of abortion. This was before abortions became legal in New York State and, therefore, abortions were done only therapeutically or under less than the best medical circumstances. The problem was discussed by a panel including a physician, a lawyer, and members of the clergy.

Menstruation and its physiology were next discussed, especially its impact on the teenager, who may have been poorly prepared for this major event in her development. The physiologic and psychologic factors in menstrual pain were also discussed.

Pregnancy and childbirth were approached from the point of view of the couple’s interaction as well as the problems that the woman faced as she began the responsibilities of motherhood. Techniques of obstetrical analgesia were discussed and compared with concepts of psychoprophylaxis in childbirth. The panel for this program included teachers in the Lamaze technique, an obstetrician, and several women who had recently given birth, relating their experiences in childbirth and adaptation to motherhood.

At the next session, pelvic pain was discussed. Some of the disease processes associated with pelvic pain were described but stress was placed on the fact that pelvic pain might be psychologic in origin. It might provide the woman with a respectable entrée to the physician’s office where she might hope to discuss her sexual problems. It might be a manifestation of some sexual anxiety, frustration, or guilt perhaps providing a means by which she could withdraw from sexual contact.

We next looked at amenorrhea, the cessation of menstruation, and discussed this problem from the endocrinologic as well as the psychologic point of view.

The broken marriage as a stress situation was taken up

ALUMNI DAY
SATURDAY
FEBRUARY 23, 1974

under the guidance of a divorce lawyer, a marriage counselor, a clergyman, and a psychologist who presented their viewpoints on the overall problem.

Infertility can be a devastating problem. Fertility plays a major role in one's sense of worth. An infertility problem can have disastrous effects on the couple's sexual interaction. The ways in which this can be solved in terms of diagnostic and therapeutic infertility as well as the alternatives of adoption and artificial insemination were discussed and the problems involved for each were evaluated.

Sex outside of marriage was the next topic and it included a discussion of the reasons for and reactions to sex before marriage and outside of marriage.

Psychological Trauma

A woman requiring a hysterectomy often undergoes a major psychological trauma. The importance of the uterus and menstruation varies with the culture. An attempt was made to gain an understanding of the problems a woman faces in this area as she attempts to maintain her identity as a woman in the face of what she may consider to be mutilating or "desexing" surgery.

The logical extension of this discussion was in the area of menopause and the psychological and endocrine events that were associated with it. Here again, the team approach was used with faculty members representing gynecology, endocrinology, and psychiatry present.

The elective closed with two sessions on female and then male sexual dysfunction. An attempt was made to impart the principles of sexual history taking, as well as information about the kinds of problems one would encounter, and an understanding of the therapeutic approach to them.

Because the numbers in the group were small, it allowed each of these sessions to be in the form of a seminar and informality and exchange of ideas was encouraged. After completing the first elective series, we had the feeling that it took several sessions for the students to lose their self-consciousness to the point where they could freely ask those questions that were really on their mind. Therefore, when we repeated the series in the following year, we preceded it with an all-night "encounter" session which was arranged for us by Dr. Marion Hamburg, professor of education, who was teaching a pre-doctoral program in sex education at the NYU Graduate School of Health Sciences. Though the staging of this event presented some logistic problems, it was our feeling that it was worthwhile in that the group did seem to open up earlier and participate more freely in the give and take of opinions.

Concurrently, the department of urology was also offering an elective in the area of male infertility and reproductive physiology. Both of these electives were well received and over-subscribed.

Student Pressure

As we had hoped, pressure came from within the student body to provide the opportunity for the entire medical school class to receive training in human sexuality. Representatives of the departments of psychiatry, urology, and obstetrics and gynecology were requested by the second-year curriculum committee to present a proposal for a course in human sexuality. This proposal was made and accepted but it was decided that the first-year curriculum

provided a greater latitude for its inclusion. The goals of this course were to provide the students with a body of information in the area of human sexuality and, in addition, to break down some of the barriers which might inhibit their discussing these emotionally charged areas with patients, fellow students, and faculty.

From the onset it was obvious that there were two major problems. The first was the problem of scheduling, which made it necessary to work with the class as a whole. This meant that the material would be presented to 135 students at a time which would greatly limit informal discussion. And, secondly, there did not exist, within the confines of the School of Medicine, a faculty with the expertise for dealing with the wide range of topics that we wished to present. The format decided upon was to have a two-hour session with a panel or individual presenting the material for one hour with interruptions encouraged, and then a second hour for as much of a question-and-answer session as possible. We decided to choose the individual who we felt was most expert in each area even if he were not from within the School so that a "home grown" faculty could be developed for the following year—faculty members who had had the benefit of participating in the expert presentation.

Wide Range of Prior Experience

Because our students brought to us a wide range of previous experience, it was felt necessary to begin the program with a group of rather explicit films which were designed to serve two purposes: to produce a certain degree of desensitization as well as to provide at least visual knowledge of the range of sexual practices. Though these films were no more explicit and decidedly less titillating than those that were easily available on 42nd Street, they did represent an innovation in the usual medical school audiovisual bill of fare. Though they were first greeted with a certain amount of nervous giggling and commenting, they were soon accepted in the spirit in which they were presented and appeared to have accomplished their purpose.

To partially solve the problem of the large class size, this material was also reviewed in small discussion groups as part of the teaching in the department of psychiatry. The lectures were given on a weekly basis over 14 weeks in the second half of the first year. The subject matter covered was: physiology of sexual behavior; variations in sexual techniques; cultural conditions and sexual attitudes and practices; ontogeny of sexual behavior, developmental aspects—sexual learning and sexual behavior from infancy to adulthood; psychosexual differentiation, gender role (what we learn from human intersexes); contraception, pregnancy, and abortion; sexual inadequacy; treatment of sexual inadequacy; homosexuality, transvestism, transexualism; our mammalian heritage, a comparative approach to human sexual behavior; fertility, adoption, insemination; sex and aging; religion, the law, and sexual behavior; erotic art and pornography.

We went to California for our lecturer on "our mammalian heritage." It was delivered by Dr. Beech from the faculty of the University of California. We went to New Haven for our speakers on the subject of human sexual inadequacy as Philip Sarrel '62, and his wife, Lorna, an associate in research, also at Yale University School of Medicine, joined

our panel. It was appropriate that Dr. Sarrel return to his *alma mater* for this purpose. We utilized representatives of the legal profession and adoption agencies, and in our panel on religion, the law, and sexual behavior, we had representatives of the three major religions participating.

At the end of the course, we requested that the students fill out a critique for us and, in general, this proved to be quite helpful in evaluating those points of the course that appeared to be most effective and those subjects which missed their mark in either presentation or material. The course was repeated in basically the same format in the following year. The course had been streamlined to 11 sessions with the elimination of those subjects which experience had shown to be either unnecessary or capable of being incorporated into another session. We went less far afield for our faculty in the second year, as our own staff became more capable of presenting material effectively. In this year, with major Supreme Court decisions in the area of abortion and pornography, we devoted more time to the law and eliminated the role of religion in sexuality. We again invited representatives from the male and female homosexual community to appear in the panel discussion chaired by Arthur Zitrin '45, professor of psychiatry. The Sarrel's were again invited to join us, basically, because their interaction in their teaching program so exemplifies the way in which male and female co-therapists can function together in a Masters and Johnson therapeutic session.

Sexual Knowledge Test

This past year, the students were requested to take a standardized sexual knowledge and attitude test [Ed. Note. The SKAT, described by Dr. Lief on page 6.] prior to the first course session and then to take the same examination after the last session. Though we have not yet completed evaluation of these examinations, we hope to come up with some information as to the effectiveness of our course in modifying either knowledge or attitudes in the area of sexuality.

This academic year, the third-year class will be the first to enter obstetrics and gynecology having had a course in human sexuality. Currently, there are two lectures in the third year on sexual physiology and sexual dysfunction. These lectures will probably no longer be necessary since the students have been given a far broader preparation than just the two lectures. We would hope to use these two sessions for a further development of this material and to have the advantage of a small group session to involve ourselves in role playing, sexual history taking, refinement in attitudes and correlation of the material with the other course work in obstetrics and gynecology.

It has been decided by the administration that the course in human sexuality will be moved into the second year. This means that no such course will be taught in the current academic year, since the current second-year class will have had it and the current first-year class will have it next year. This will, perhaps, give us an opportunity to experiment on an elective basis with the teaching of the material to small groups as compared to the large lecture sessions. After two years of teaching the course, it is apparent that the large lecture series, even supplemented by small group sessions in psychiatry, and later a small group session in the third year on obstetrics and gynecology, has definite limitations.

Our students are married and single, male and female, experienced and inexperienced. It would be far more effective to have the opportunity for an immediate feedback with each student to see how they are interpreting and accepting the material and to give them a more active role in the teaching process.

With almost every medical school now becoming involved in teaching human sexuality, New York University is in serious danger of falling behind unless it can develop a faculty whose full-time responsibility is in this area. At the present time the course is being taught by clinical faculty who have other responsibilities. If the course is to be taught in small group sessions, then a much greater teaching time will be necessary and a faculty must be available for this purpose.

The department of obstetrics and gynecology may soon be establishing a chair in the medical aspects of gynecology in memory of Dr. Kleegman, who was a pioneer in this area. This faculty member will have primary teaching responsibilities in the areas of infertility, family planning, and human sexuality. It is our hope that this individual will provide the nucleus for a group of faculty members trained in this material and with the time available for the teaching effort necessary to present it in the most effective way.

The Seats of Learning

These are located in the Berman Lecture Room of Alumni Hall where medical students and graduate physicians alike acquire new knowledge and sharpen old skills.

You can assist in the campaign to support this educational facility and at the same time be acknowledged in perpetuity for your contribution by designating a seat in the lecture room.

Designate your seat now by using the coupon shown. Please write or call me or Sam Kenin at the School, 550 First Avenue, New York, N.Y. 10016; telephone (212) 679-3200, Extension 3527 for further information.

WALTER LEVY '24 *Chairman*

NEWS FROM THE SCHOOL

Alumni Receive 25-Year Faculty Citations

Twenty-five-year citations were presented on June 26 to 75 members of the faculty of the School of Medicine and Post-Graduate Medical School by Dr. Ivan L. Bennett, Jr., provost and dean of the Medical Center.

This was the 25th anniversary of the merging of the New York Post-Graduate Medical School and Hospital with New York University. Thus, all of the surviving active members of the old Post-Graduate Medical School who had joined the NYU faculty at that time were given citations.

Alumni receiving citations were: George Anopol '20, professor of clinical orthopedic surgery; Nathan Cabot '37, clinical assistant professor of pediatrics; Harold D. Dundy '33, clinical instructor in pediatrics; Saul J. Farber '42, Nathan Friedman Professor of medicine and chairman of the department; Andrew G. Franks '32, professor of clinical dermatology; William Mackler '40, associate professor of clinical surgery; Myra R. Palmer '40, clinical associate professor of psychiatry; George M. Saypol '35, associate professor of clinical surgery; and Marvin Stern '39, professor of psychiatry.

Breast Cancer Research

The Medical Center has been granted a contract for \$100,000 from the Breast Task Force of the National Cancer Institute for the study of the "Cell Cycle Kinetics of Human Breast Cancer." The principal investigators are Drs. Joseph Post, professor of clinical medicine, and Joseph Hoffman, associate professor of clinical medicine.

Under study will be the proliferative patterns of human breast cancer cells *in vivo* and *in vitro*. Techniques of cell cycle analysis will be adapted to obtain data which may correlate not only with the clinical course of primary and metastatic disease, but also with clinical response to non-surgical therapeutic programs.

The goal is to achieve more effective antitumor therapy. The laboratory studies will be done at the NYU research service at Goldwater Memorial Hospital, Roosevelt Island. Collaborating institutions include Lenox Hill Hospital and the Long Island Jewish-Hillside Medical Center and its Queens Hospital Center Affiliation as well as Bellevue Hospital Center and University Hospital.

Concerts at the School

The School of Medicine is embarking on its ninth consecutive season of concerts supported by an anonymous benefactor, for medical students, faculty, alumni, staff and their friends. Admission is by ticket on a "first-come-first-seated" basis. Free tickets may be obtained at the office of the dean. All concerts will be held on Mondays at 8 p.m. in the Alumni Hall Auditorium.

Upcoming concerts are:

November 26: Music of the Period of Monteverdi and Carissimi. Hugues Cuenod, tenor; Albert Fuller, harpsichordist, and Fortunato Arico, viola di gamba.

December 3: Piano Recital, Joseph Villa. Music of Mozart, Beethoven, Brahms and Liszt.

December 17: The New York Chamber Soloists. Divertimenti of Mozart.

January 14: The Manhattan Chorale. Richard L. Zorn, music director. A program of sacred and secular music of the Renaissance.

Mellon Foundation Grant

Cited as one of 15 American medical schools with "especially distinguished records in preparing teachers and research scientists for service in medical schools," the School of Medicine has been awarded \$275,000 by the Andrew W. Mellon Foundation. The grant will assist the career development of selected young teachers and investigators in the basic medical sciences.

Mellon Foundation President Nathan Pusey, in announcing the grants, said: "The funds are designed to enable the deans of these schools, in face of threatened cutbacks in their budgets, to encourage a significant number of the ablest of the emerging generation of young scientists to advance their careers in medical education and research. It is our aim in making these awards to do what we can to prevent or minimize a threatened break in the forward movement of medical education and research."

Milbank Named to Board

Jeremiah Milbank, who is active in the private investment management business, has been elected to the board of the Medical Center. Mr. Milbank is president of the ICD Rehabilitation and Research Center which has a close association with the Medical Center. The Milbank Research Laboratories at the ICD are a joint effort of the two institutions.

A native New Yorker, Mr. Milbank is chairman of the board of directors of the Commercial Solvents Corporation. He is a graduate of Yale University and earned the Master of Business Administration degree at Harvard. From 1943 to 1946 he served in the United States Navy as a lieutenant in the Reserves.

Mr. Milbank is a director of the Chase Manhattan Bank, a trustee of George Washington University, president of the J. M. Foundation and a director of the Herbert Hoover Foundation. He is also treasurer and trustee of the Robert A. Taft Institute of Government and a treasurer of the Boys Club of America.

Horticultural Therapy

"Horticulture as a Therapeutic Aid" is the title of a monograph written by Howard D. Brooks, horticulturist at the Institute of Rehabilitation Medicine. Mr. Brooks, widely recognized as an authority on horticultural therapy, has lectured to occupational therapists, groups of horticultural students, horticultural societies and garden clubs throughout the country. His co-author is Charles J. Oppenheim, a full-time volunteer at the Enid A. Haupt Therapeutic Greenhouse at IRM.

In the foreword to the monograph, Dr. Howard A. Rusk, Howard A. Rusk Professor of rehabilitation medicine and vice president of the Medical Center for IRM, notes that the Therapeutic Greenhouse was established in 1959 under a grant from Mrs. Haupt. Since that time, Dr. Rusk notes, "patients have not only found joy and solace in the program, but many have gone on to follow careers in horticulture or as florists." Dr. Rusk calls the new monograph "unique and excellent."

Jerry Lewis MDAA Center

The Jerry Lewis Neuromuscular Disease Center has been established at the Institute of Rehabilitation Medicine of the Medical Center.

An initial grant of \$146,776 from Muscular Dystrophy Associations of America will enable the MDAA clinic now functioning at the Institute to provide more comprehensive diagnostic and clinical services for children and adults with muscular dystrophy and allied muscular diseases. The Center also will provide genetic counseling, training for medical and paramedical personnel, and other services. In addition, the new unit will conduct clinical research, as well as workshops and educational projects for physicians, nurses, patients and their families.

Co-directors of the Center are Dr. Joseph Goodgold, professor of rehabilitation medicine at the School of Medicine, director of research and education of the department of rehabilitation medicine and director of the electrodiagnostic service of IRM, and Dr. Leon Greenspan, professor of clinical rehabilitation medicine and director of clinical services of the George G. Deaver Children's Division of IRM.

ALUMNI NEWS NOTES

Dr. Scheer

Alan A. Scheer '46, an otolaryngologist in private practice in New York, has been named to the NYU board of trustees. Dr. Scheer has been a vigorous supporter of alumni projects. He was awarded the Alumni Meritorious Service Medal in 1972, and named a vice president and director of the Alumni Federation in May.

In the School of Medicine Alumni Association, he has been treasurer, secretary, vice president and president, as well as chairman and member of numerous committees. He has also served as chairman of the Medical Alumni Fund.

As an alumni trustee, he will serve in the same capacity as regularly elected board members, but alumni trustees succeed themselves.

Mrs. Schwartz Also Named

Also named to the board was Mrs. Arnold Schwartz. Mrs. Schwartz, who writes under her maiden name, Marie Smith, served as a White House correspondent for The Washington Post for 16 years and wrote a number of books drawn from her experience and research. She has received many awards, including the Catherine L. O'Brien award for excellence in women's news reporting. She is a trustee of the American Academy of Dramatic Arts in New York and the Brookdale Hospital Medical Center in Brooklyn.

Dr. Harber

Leonard C. Harber '53, recently professor of dermatology at the School of Medicine, has been appointed professor and chairman of the department of dermatology at the College of Physicians and Surgeons and director of the dermatology service at the Presbyterian Hospital.

After obtaining his baccalaureate degree from Johns Hopkins in 1949, Dr. Harber was associated almost exclusively with NYU. He interned at Bellevue from 1953 to 1954, and did postgraduate work in dermatology and syphilology at the Post-Graduate Medical School for the next two years.

Fulbright Scholar

Dr. Harber returned to NYU after a two-year sojourn as a Fulbright research scholar in dermatology and syphilology at the University of Copenhagen. He completed his residency in dermatology and syphilology at Bellevue in 1958, earning an M.S. from the Post-Graduate Medical School the same year.

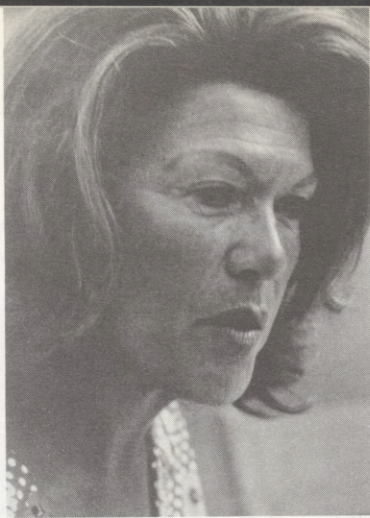

He joined the faculty in 1957 as a fellow in dermatology.

In 1969, Dr. Harber became a guest investigator in the metabolic unit at Rockefeller University, an appointment he retains.

PARTY HELD FOR \$1000 CLUB

On Sunday, August 19th, a swim and barbecue party was held at the home of Alan and Mrs. Scheer ('46), in Purchase, New York. Dr. Scheer is president of the newly formed \$1,000 Club. Membership is open to all who contribute \$1,000 or more annually to the School of Medicine Alumni Fund.

The party, with 34 alumni and wives in attendance, marked the first anniversary of the founding of the club. To date, 42 members qualify for this honor group. Among those present were:

Richard and Mrs. Amelar ('50), Allan and Mrs. Aronson ('40), Ivan and Mrs. Bennett, Harry and Mrs. Berman ('21), David and Mrs. Bernstein ('35), Seymour and Mrs. Charles ('44), Helen DeRosis ('53), Sam and Mrs. Kenin, Walter and Mrs. Levy ('24), Jack and Mrs. Lisman ('38), David and Mrs. Mahler, Virginia and Bill Mitty ('46), Joseph and Mrs. Press ('41), George and Mrs. Saypol ('35), the Scheers, Carl and Mrs. Smith ('44), and Philip and Mrs. Strax ('31).

School of Medicine

This honor roll salutes those alumni, faculty and friends who have demonstrated their devotion and loyalty through gifts of \$100 or more to the Alumni Fund for 1972-73

CLASS NOTES

'18 | Louis R. Davidson
1025 Fifth Ave., NYC 10028

The Class of 1918 held its 55th anniversary reunion at the Colony Restaurant on May 13. Those who attended with their wives were: Louis R. Davidson, Joseph Eidelsberg, Benjamin M. Eis, Samuel Z. Freedman, Hyman A. Levin, Sandor A. Levinsohn, Herman P. Posner, Anthony C. Saeli, Robert H. Stockfisch; Maximilian Rosenberg and his wife brought their son and daughter-in-law, Dr. and Mrs. Roberts. Morris M. Weiner was there with his two daughters. Also present were Harry S. Bikoff, Harry F. Cohen, Louis Freimark, and Jack Stein.

It was a most successful afternoon and we hope to repeat the get-together soon.

'21 | Victor Knapp
505 Second Ave., Asbury Park, N.J. 07712

According to an article in *The N.Y. Sunday News*, Samuel Dillon, director emeritus of the department of pediatrics at Peninsula Hospital Center, Far Rockaway, was given a farewell dinner in July at which many associates, friends and former patients were present. The article noted that Dr. Dillon had practiced pediatrics in the Rockaways since 1924. He plans to move to Florida soon with his wife, Josephine.

'26 | Arthur Alexander Knapp
23 E. 74 St., NYC 10021

Through the years the Class of '26, as with all of the other classes, has achieved genuine distinction in medicine.

Nathan T. Guttman was designated a founding fellow of AAFP. Nat has done very well through the years and retired in 1970 to pursue the sport of fishing. Catch a few for us!

Kate Miller presently is active in her Miami retreat. Unfortunately, she was in two serious auto accidents recently but has come through remarkably well. Apart from the accidents, because of much local pleasantries, Kate has decided to remain in Florida.

Sonya Monen is on a hegira to Russia. Following her participation in The World Congress in Obstetrics and Gynecology, she is touring Europe and enjoying it all.

Phil Krainin has a summer home in Naples, Maine, and a winter home in Boca Raton, Fla. When in the Florida retreat, he doesn't consult at The Northern Cumberland Memorial Hospital in Bridgton, Maine, but probably is surrounded by his children and grandchildren, all thriving.

M. Harry Feldman is a retiree also with summer and winter residences: Owings Mills, Maryland, and Sarasota. Travel and golf occupy Harry's time.

Milton Rabson is "still active in medical-legal practice, which includes investigations both here and abroad." Keep up the good work, Milton.

Endre K. Brunner not only is keeping busy with his hospital but also has taken an additional assignment as director of seven hospitals of the Department of Health, Commonwealth of Massachusetts. Endre, your busy business must keep you in good shape.

There are those of us who thrive in retirement and there are those of us who thrive on our being wed to medicine.

We all would like to thank George McKeon of the Alumni Office who has been so interested in our welfare.

'27 | William Director
67 Park Ave., NYC 10016

J. Allen Yager is now a vice president and professional services coordinator, Group Health Incorporated of New York and New Jersey.

'30 | Sidney Rubinfeld
550 First Ave., NYC 10016

The Alumni reception during the AMA convention on June 24 was a gala reunion for our class. David Bergstein came out of retirement in Florida with his lovely wife, and both report delight in retirement. Moe Grant and lady with their usual enthusiasm. Morris Herman with his charming lady. Mary Thomson looking young and sprightly after recently completing a book. Bernard Zussman, devoted alumnus from Memphis, looking very trim.

'31 | Harold Brandaleone
116 E. 63rd St., NYC 10021

Just heard from Charlie Kossman who has developed a circulatory care center with a fellowship training program at the University of Tennessee in Memphis. Is doing some outstanding research in cardiovascular disease.

Jacob W. Kahn is in full-time practice of peripheral vascular disease; has three grandchildren; and his hobbies are painting and cabinet making.

Harry H. Kaufman is retired due to a searing disability but enjoying a new life in Miami Beach catching up on writing, reading, playing the violin, and has become an A-one bridge player. His son, a dermatologist in The Bronx, is the father of two infants.

Joseph A. Porcello passed the Florida State Medical Boards in July 1971 and in January 1972 became an emergency room physician at Holy Cross Hospital in Ft. Lauderdale and J. F. Kennedy Hospital in Lake Worth, Fla. Hopes to open a pri-

vate office for general practice and family medicine this year.

Charles Falk is retired and living in a home in Eureka, California. Historian of Western section, American Urological Assn. His hobby is big game hunting.

Siegfried S. Schatten was in an automobile accident in December 1971. He sustained a fractured hip that had to be nailed and plated. His wife had a bimalleolar fracture. They are both doing well, and he is back to part-time practice.

Morris Goldman is completely retired. "Irresponsibility personified." He wants to do all the things he's been missing.

A. J. Maurot is still practicing surgery. Travels extensively in the U.S. and Europe. Still collects and lectures on Early Meissen porcelain and American furniture of the Queen Anne and Chippendale period.

Larry Gang's oldest son is interning in Boston and will start pathology at the New England Medical Center next year. His second son has started practice in law in Providence. Third son was one of the boys in a film "A Separate Peace"; now is at North Carolina University. No grandchildren yet.

Frank C. Genovese retired from active practice in 1969 and is clinical physician in Harlem Valley State Hospital. Had his 40th wedding anniversary and third coronary. One son at Hils Bohr Institute in Denmark the other one works in V.A. Hospital in Vermont as a laboratory technician. Living with his wife in their dream house and traveling.

Lee H. Schlesinger was appointed associate dean at Loyola University Medical School in 1971. He received the University's honorary alumnus award in October 1972.

Leonard Tushnet received the Frederick Christensen award given by the University of Nebraska for the best fiction of academic year 1971-1972. Latest book "The Medicine Man". Has written numerous short stories. One of his books was chosen as a model of English writing for college English classes.

'34 | Joseph Chess
1625 Ditmas Ave., Bklyn, N.Y. 11226

Jean Pakter Bachman has been associated with the New York City Department of Health since 1950 as director of the Bureau of Maternity Services and Family Planning. She is responsible for the establishment of standards and surveillance of maternity care, newborn and prematures and, for the last three years, the abortion program.

Roslyn Weichsel Barbash has developed

the state citizens' group for clean air. She served on the Clean Air Council, advisory to New Jersey Department of Environmental Protection, since its legislative inception in 1967. She has given up active allergy practice after 27 years, so engaged in environmental problems is she.

Sam Bukantz moved to Tampa, Florida in February 1971 and has been appointed chief of the allergy section of the new V.A. Hospital in that city. He is also professor of medicine at the new University of South Florida College of Medicine.

Your class agent is still practicing internal medicine. Wife Edith, is practicing clinical psychology. He has an extensive collection of art and antiques of all periods.

Emanuel V. Feigin came out of retirement to start a new department of biodynamic medicine at California Hospital Medical Center. This department deals with a host of functional diseases and has had remarkable success in reducing the OPD load at the Center.

Joseph J. Friedman is director of the Broome County Mental Health Clinic; adjunct professor of clinical psychology at the State University of New York at Binghamton, and consultant in psychiatry at Binghamton State Hospital.

Harold W. Glascock, Jr. returned to Raleigh, N. C. (his home town) in 1969. He is director of the clinical evaluation unit, director of the detoxification unit, and acting director of the central medical unit at Dorothea Dix Hospital in Raleigh.

Barnett A. Greene is busier than ever in four ghetto hospitals in Brooklyn. Lee (wife) retired from Board of Education.

Charles R. Hayman has retired from the District of Columbia Health Department and is now a consultant to Control Systems Research in Arlington, Virginia.

Herman I. Kantor discovered a new age of man—the age of travel. Encouraged by invitations to lecture, he visited Russia, Israel, the Greek Islands and San Francisco. The Russians are most interested in American techniques and practice of medicine. They still use the ambulance system to render general medical care.

Saul H. Karlen moved to La Jolla, California in 1968 where he is engaged in psychoanalytic practice, teaching and consultation.

Bertram L. Levy just started his 38th year in government service. He is deputy regional medical director with the V.A., overlooking 44 hospitals and three large clinics in the Northeast section of the U.S. Certified in internal medicine, he misses former patient care and teaching activities.

Marvin Linick's hobby is standard breeding and racing.

Leo L. Orenstein is clinical professor of psychiatry. He received a 35-year service award on Alumni Day 1973.

Lazarus A. Orkin was visiting professor in urology at Hadassah Medical School in November, 1972. He presented a paper on "Candiceden in Treatment of Benign Prostatic Hypertrophy," at the Canadian Urological Association in Vancouver, B.C., in June 1973.

David Rosenbaum retired last year from Indianapolis V.A. Hospital, where he was chief of laboratory service, and from the University of Indiana School of Medicine, where he was professor of pathology. Enjoying leisure and hobbies and children and their families.

Alvin A. Rosenberg writes: "Son, Carl, is resident in internal medicine at St. Vincent's Hospital in New York; son, Eric, is finishing second year at New York Medical College."

Milton S. Saslaw during the past year had two serious bouts of illness—a diabetic coma in May and a stroke in July. He has made a complete recovery. He spent 2½ months in medical supervision of a typhoid fever outbreak in South Dade migrant labor camp.

Joseph A. Schwartz is professor of medicine at the Los Angeles Medical Center and attending physician at the UCLA Medical Center.

David B. Simpson is director of surgery at Bayonne Hospital and clinical associate professor of surgery at New Jersey College of Medicine.

Barney Sisserson returned his card without comment.

Harry Slobodin is still practicing radiology full time.

Nathan Spector retired from practice of general surgery and is living permanently in Florida. His hobbies are oil painting, boating, fishing and "searching for new experiences in dining."

George J. Train is still in practice and enjoying it—but aware age is present. Vita keeps busy teaching.

Sidney Tucker writes: "Son, Michael, in last year at Columbia University Law School."

Charles E. Hollingsworth writes: "Am still active at San Antonio State Chest Hospital, and travelling any place whenever I can. Have a son in medical school of the University of Texas system. The methods of teaching have changed so much since our time in school!"

35 Leo Rubenstein
1860 Grand Concourse Bronx, N.Y. 10457

Sam Bloom was one of those interviewed in a recent issue of the *Mount Sinai Medical Center News* on the subject of the returning POW's. Sam was captured on Corregidor and was liberated from Santo Tomas Internment Camp in Manila. He later became Commander of the American Defenders of Bataan and Corregidor.

He was also mentioned in the book by John Toland entitled "The Rising Sun."

Mary Lou Byrd writes that she is busy with practice in Grand Rapids, Michigan.

Sid Davidson, who was one of the original Florida settlers, writes that his son, Richard Alan, a graduate of the Vanderbilt University Medical School, is interning at Vanderbilt Hospital in Nashville. He will be resident in medicine there next year. Maybe, according to the grapevine from patients visiting in Lake Worth, Richard will join the Davidson Clinic.

Lou Glick, diplomate of the American Board of Obstetrics and Gynecology and fellow of the ACOG, is chief of obstetrics and gynecology at Vallejo General Hospital. He still loves swimming—his pool is quite different from the Friday swim sessions locally in our first year. He still plays the violin, also collects and repairs antique clocks. His wife, Lucille, is proud, with him, of their daughter, Bryna, and son Peter—both graduates of the University of California—and of son Paul, who is still in high school.

Joel Hartley, who is clinical professor of orthopedics at the Mount Sinai School of Medicine, writes, "With one of my two daughters already practicing medicine, and my second daughter (the anthropologist) ready to start medical school, my lovely wife has to listen to all this medical stuff."

Carl Kornreich is now the director of the drug program at the Bronx V.A. Hospital. He now has three papers in progress—"Evaluation of the Drug Program, Bronx V.A. Hospital, Oct. 1971 to March 1973," "Habilitation vs. Rehabilitation of Drug Addicted Patients, Bronx V.A. Hospital," "The Two Faces of Maria—a complete dissociation of two personalities in a schizophrenic patient."

Milt Palestine, who now is at 8176 Ferguson Green, Buena Park, Calif., is the director of the methadone detoxification program for heroin addicts at the Metropolitan State Hospital, Norwalk, Calif. He published "A Study on Serenil vs. Thozazine" in the *Journal of Nervous Disease* and "Haldol in Acute Alcoholism" in the *Alcoholic Quarterly Journal*. He visited Castle Peak Mental Hospital in Hong Kong in July 1972.

Joe Polito is now chief of staff at Doctors Hospital, Hollywood, Florida. He has left Brooklyn for 507 Hibiscus Drive, Hallandale, Florida 33009.

George Saypol's son, David, graduated from Alfred and is now in our first-year class. His daughter, Marjorie, is married to Edward Schoenberg, a meteorologist in Pittsburgh. They are both graduates of the Heights. Marjorie got her Master of Library Science degree at the University of Maryland.

Richard Waltman is clinical professor

of obstetrics and gynecology at the Downstate Medical Center and attending obstetrician-gynecologist at the Brooklyn-Cum-berland Medical Center. His most recent publications are two papers on the effects of non-steroid acidic drugs on prostoglandin synthesis, in the January and July 1973 issues of the journal, *Prostoglandins*.

Howard Wesson's son, Danny, is another Heights graduate—but not interested in medicine. Howard is attending surgeon at the Bronx-Lebanon Hospital Center, spending much time overseeing surgery house staff and resident training. He is associate professor of surgery at the Albert Einstein College of Medicine.

Herb Woodel is director of ambulatory clinics at Wyckoff Heights Hospital. He is a charter fellow of the American Academy of Family Practice. His three children are all married. His daughter lives in Belgium, his older son in Providence, R. I., and his younger son in Commack, Long Island. He has two grandchildren so far, with a third expected in January. He is still active in private practice, with his wife as secretary and assistant, and he plans to continue.

'37 | Gerald J. Friedman
850 Park Ave., NYC 10021

Sidney R. Weinberg is leaving New York City to become urologist in the U.S. Virgin Islands hospital system.

'38 | Nathan H. Shackman
612 S. Barrington Ave.
Los Angeles, Calif. 90049

Your class agent writes: "Since our Alumni Day reunion things have been happening—for one, we have relocated in Los Angeles. I am a staff physician at Wadsworth V.A. Medical Center in the same facility with Stuart Kayland. Please note my new address and send news. Our 35th reunion was held on October 20. Report in the next *Quarterly*. I hope to gather our west coast alumni for a reunion. Will keep you informed."

'40 | Jesse W. Mahoney
Box 897, Setauket, N.Y. 11785

Helen Read Deal writes: "Every time the *Quarterly* comes it gives me twinges of homesickness. And I feel right embarrassed at the minimal support I'm able to send to NYU, which hardly reflects the genuine affection I feel for both my *alma mater* and the many friends I knew there."

"But I married into a medical family. My husband, Albert, has long been a member of the Composite Board of Medical Examiners of the State of Georgia. . . . And our son is presently a junior in the Medical College of Georgia, the 14th

member of the immediate family to enter the profession. . . . I really miss all my old friends." Helen is at: Memorial Clinic, P.C., Statesboro, Georgia 30458.

'43M | Marilyn T. S-hittone
2 Split Rail Lane
East Setauket, N.Y. 11733

Herman N. Eisen has been named professor of immunology in the department of biology and a senior researcher at the newly-formed center for cancer research at the Massachusetts Institute of Technology. He was formerly professor and head of the department of microbiology at Washington University School of Medicine, St. Louis, Mo., and is currently a member of the board of scientific counselors for the National Institute of Arthritis and Metabolic Diseases.

'43D | Irene Shapiro
65 Central Pk.W., NYC 10023

Daniel Adler is doing obstetrics and gynecology in Westport, Conn., and is attending at Norwalk Hospital. He has four children, the oldest in publishing, the next at NBC, the other two in college.

Our 30th reunion will be held in December — further information will be mailed to you.

Abraham Schlossman participated in the 2nd Ophthalmologen-Kurs der Augenklunik Prof. Dr. Remky in Munich in April, the LXXX Congress of the Societe Francaise d'Ophtalmologie, of which he is an American delegate for the Eastern Seaboard, in May, and the 6th Curso Internacional de Oftalmologia of the Instituto Barraquer in Barcelona, also in May. In June, during the annual meeting of the American Medical Association in New York City, Dr. Schlossman was elected vice chairman of its section council on ophthalmology (he had been a delegate to this council since 1971).

'45 | Joseph G. Benton
20 Continental Ave.,
Forest Hills, N.Y. 11375

Arnold G. Blumberg writes "Oldest daughter, Flori, received her MPH this August; son, Martin, a junior at De Pauw University; daughter, Emily, entering Princeton in September; wife, Barbara, running for town councilwoman of North Hempstead on Democratic line. So, I keep working as chief of medicine at Manhasset Hospital, director of medical services Hillside division, Long Island Jewish Hospital Medical Center and associate professor of medicine at SUNY (Stony Brook)."

Stuart H. Walker is professor of pediatrics at the University of Maryland. His most recent book "Sailboat Racing, Wind and Strategy" was published in 1973. Win-

ner of championship in Switzerland sailing class, July 1973.

Maurice Goodgold is now associate professor of radiology at Mount Sinai School of Medicine. He is attending radiologist at Beth Israel Medical Center and associate attending physician for vascular radiology, full time.

'47 | Horace S. Blood
194 Pleasant St., Concord, N.H. 03301

Your class agent writes: "I hope you have all had a chance to see the 'Jaundiced Eye' by Ralph Crawshaw which seems to be appearing regularly in the magazine, *Prism*."

'52 | Edwin S. Robbins
49 E. 96 St., NYC 10028

Jacob Hirsch, associate professor of medicine, has been appointed medical director of the newly-formed biomedical engineering unit of Bellevue Hospital Center. Jack has been involved in the training of engineers and physicians for many years, and is optimistically looking forward to increased research productivity and development of patient care programs.

Spoke with Wally Sall when my family stopped over in Miami last June. As a full-time resident, involved with his practice and business activities, Wally doesn't have too much time for tourist attractions like swimming and boating. He was looking forward to sending his children to camp in New England and flying up to visit them.

George Craft, 1969-1970 president of the Alumni Association, recently moved from New York to Phoenix, Arizona, where he is engaged in private practice. An internist, he was medical director of Blue Cross for 17 years and also was an active participant in New York County Medical Society affairs. He was a member of the Society's editorial board for many years and chairman from 1963 to 1970. He served as a Society delegate to the House of Delegates. George was on the attending staffs of University and Bellevue hospitals and New York Infirmary. He is a fellow of the Industrial Medical Association and the American Academy of Occupational Medicine.

Keep in touch.

'55 | William W. Filler, Jr.
4950 San Bernardino St., Suite 106
Montclair, California 91763

I am sorry to report that Ken Barton died in San Francisco, Calif. on June 11. He left three children. Ken was in private practice in San Francisco at the time of his death.

In a happier vein I'm pleased to report that Mort Rosen has been appointed director of obstetrics and gynecology at

Cleveland Metropolitan General Hospital and will be professor of obstetrics and gynecology at Case Western Reserve University Medical School. Mort has done extensive research in perinatal physiology especially in fetal encephalography. Mort's wife, Lynn, has a doctorate in education and Mort's two boys are playing high school football.

Doris Rapp is a specialist in allergy in Buffalo and has written a book called "Allergies and Your Child."

Henry Claman has been at the University of Colorado Medical School for twelve years and is professor of medicine and microbiology and head of the division of clinical immunology.

Marty Josephson is in practice doing psychoanalysis and child psychiatry in New York. He teaches child psychiatry at Mount Sinai Hospital. He graduated from the New York Psychoanalytic Institute in 1969 and in 1972 was elected as a fellow of the New York Academy of Medicine.

Bob Bases is associate professor of radiology and radiobiology at Albert Einstein Medical Center and is quite active in cancer research. Bob writes that he has three children and still is an active fencer.

Marv Eiger is a pediatrician and Bantam Books is about to publish a paperback of Marv's hardback book "The Complete Book of Breastfeeding," which was published in June 1972.

Harvey Moser lives on Long Island with his wife, Harriet, and two children, Andrea, and Michael. He practices dermatology and often takes vacations with Ralph Schlossman who lives nearby.

Seymour Boorstein practices psychoanalysis at 45 Laurel Grove Avenue, Kentfield, Calif. 94904. Seymour has been elected a fellow of the American Psychiatric Association and is on the faculty of the University of California San Francisco School of Medicine.

Frank Gump is still a full-time associate professor of surgery at Columbia.

Harold Weiner is living at 5121 Colbath Avenue, Sherman Oaks, Calif. 91403. Harold is board-certified in internal medicine and nuclear medicine. He is active in the practice of both fields and his hobby is oil painting.

Paul Curtis is the president of a three-man corporation which practices pediatrics. He is on the teaching staff at the Rutgers Medical School and has some of his sculpture exhibited at two local galleries. Paul has two children, Steve, 12, and Nancy, 10. Paul's wife, Gilda, also makes pottery which is on exhibit.

Paul Packer writes that he is still single, is in private practice in New Rochelle and is assistant clinical professor of obstetrics and gynecology at Albert Einstein. He also writes that the vagaries of the stock

market wiped out some short-lived financial success.

Marty Gruber is an orthopedist in Long Beach, Long Island. He is director of orthopedics at the Long Beach Hospital and is president-elect of the New York Society of Orthopedic Surgeons. He has four boys ranging from 1½ to 17 years in age and he is in charge of the children's orthopedic service at the Nassau County Children's Medical Center.

Sam Charache writes that he is trying to organize a community advisory board to help in devising a workable protocol for experimental therapy in sickle cell anemia. Sam also writes that much of his spare time is taken up around the house and he and Pat have a daughter, Barbara, who is almost 14.

Charlotte Rappaport Colp writes that she specializes in chest medicine and is assistant clinical professor at Albert Einstein. She runs the pulmonary function lab and does research there. She is married to Dr. Ralph Colp and has two daughters, 11, and 13.

Leonti Thompson is in private practice in psychiatry in Napa and Alameda counties in California. He has a son, Lee, who is 13 and his wife, Corazon, is a concert pianist.

Ron Jaffe lives in Florida, is in the practice of anesthesiology and recently organized the Treasure Coast Anesthesia Society. He has a son who is pre-med at Dartmouth College and Ron writes that he is an amateur art collector, especially, "Reverse Paintings".

Barry Josephson lives in Spring Valley, New York and practices allergy at 50 Riverdale Avenue in Yonkers. He has presented several recent papers in Florida, Westchester and Georgia. His hobby is growing and training Japanese Bonsai plants.

Ron Chapnick is a pathologist and is director of pathology at the Lake County Memorial Hospital in Cleveland and is assistant clinical professor of pathology at the Lake County Memorial Hospital in Cleveland and assistant clinical professor of pathology at Case Western Reserve School of Medicine. He is past president of the Cleveland Society of Pathologists and now has five children, four daughters and one son.

Jerry Goldfischer practices cardiology in Fort Lee, New Jersey, and lives in Englewood Cliffs with his wife, Joan, and four daughters. He is chief of cardiology at the Englewood Hospital and attending cardiologist at the Montefiore Hospital.

Maury Kogut is assistant professor of pediatrics at the University of Southern California School of Medicine. He is head of the department of endocrinology and metabolism at Childrens Hospital at Los Angeles and program director of clinical

research there. Maury's family consists of his wife, June, and three daughters, ages twelve, eleven and eight. They were to leave for Switzerland in September to study at the University of Geneva. Maury says that bike riding is the family hobby and he would love to see any classmates passing through Switzerland. With the dollar shortage he writes that he will also welcome "Care" packages.

Howie Zauder is professor and chairman of the department of anesthesiology and professor of pharmacology at the University of Texas Health Science Center at San Antonio. He is editor of *Clinical Anesthesia*, a member of the board of governors of the American College of Anesthesiologists, chairman of the section of education of the American Society of Anesthesiologists and secretary of the section on anesthesiology of the Southern Medical Association. He is also president-elect of the Behar County Hospital. It's too bad that Howie has been wasting all of his time since medical school.

Dick Hoff is in private practice in internal medicine in Westwood, New Jersey. He is associate director of the department of medicine at the Pascack Valley Hospital in Westwood. He has three daughters the oldest of college age, and his hobbies are golf and building hi-fi kits.

Marty Reisman lives at 5904 Ranchito Avenue in Van Nuys, California and is director of medical education and a pediatric cardiologist at Kaiser Permanente in the San Fernando Valley. He has three children ranging in age from 9 to 15 and all are competitive figure ice skaters. Marty writes that he's happy with life, and NYU and the class of '55 seem like a distant dream.

Arnold Sobel is director of anesthesia at the Pascack Valley Hospital in Westwood, New Jersey and is assistant clinical professor of anesthesiology at Albert Einstein College of Medicine. The Sobels have three children, Marc 15, Lindy 13 and Jonathan 6.

Antonella Brughera Jones has her boards in hematology as well as internal medicine. She recently spent a month in Ethiopia as a visiting professor in hematology.

Paul April writes that he is practicing internal medicine and rheumatology and looks forward to summer vacations in Colorado and occasional travel. He has three children, ages 17, 15 and 9½.

George Dengler is a diplomate of the American Board of Family Practice and is active in the field of mental retardation. He is on the county boards and State Association for Aid to the Mentally Retarded in the state of Washington. George likes to climb mountains in Western Washington and is a member of the Seattle Mountaineers. He has four children.

I'm sorry to report that I got postcards from **Ralph Bernstein** on which nothing was printed but his name and one from **Frank Zimmer** with a stamp giving his address as 251 Sylvania Avenue, Neptune City, New Jersey, 07753. I would hope to hear more from them and from our other classmates in the near future. As for your class agent I visited San Francisco last spring and had dinner with **George Nugent** and his lovely wife, **Dianna**. George is a surgeon at Kaiser Permanente in Oakland. I am living happily in the foothills of the San Bernardino Mountains with my wife, **Noreen**, and my son **Bill**, who is now 20, an honor student at the University of Miami. I am currently chief of staff and chief of obstetrics and gynecology at Doctors' Hospital of Montclair, which is five minutes from my home in Claremont. I am very active in community affairs and coached the local Pop Warner Football team last season. I moved into a new suite of offices right next to the hospital in March. This office is one I designed in my head twenty years ago and has finally come to fruition. I would be happy to hear from any of my classmates who visit Southern California and would be delighted to have you as guests any time. By 1975, I hope our reunion will be as successful as the careers of our class members seem to have been so far.

'56 | **Lawrence R. Ross**
206 E. 30 St., NYC 10016

Your class agent writes: "I am sorry to report to you the death of our classmate, **Sam Phillips**. Sam was an attending physician in radiology at Memorial Hospital. We express our sincere condolences to his wife and children.

"Let us hear some good news from our

classmates. I know there is lots of it around, and there are many of us who would be delighted to hear it."

Ephraim Glassman, associate professor of medicine, is one of 13 scientists awarded contracts by HEW's National Heart and Lung Institute for the planning phase of collaborative studies to investigate coronary artery bypass graft surgery. The surgery is for improving the blood supply to blood-deprived (ischemic) areas of heart muscle and for relieving angina pectoris and other clinical manifestations of coronary heart disease.

Ralph G. DePalma has been promoted to professor of surgery at Case Western Reserve University School of Medicine. He received his A.B. from Columbia College and completed his surgical training at University Hospitals of Cleveland and in 1964 was appointed instructor in surgery, becoming associate professor in 1969. Ralph is a member of many professional organizations including the American College of Surgeons, The Society of University Surgeons, and the Council on Arteriosclerosis of the American Heart Association. His clinical interests focus upon vascular surgery with research interests in shock and arteriosclerosis.

lomite of the American Board of Internal Medicine and a diplomate of the subspecialty Board of Allergy and Immunology. He is also a visiting physician at Bellevue Hospital Center and University Hospital and an officer of the New York Allergy Society. Howard has published a number of papers in the field of penicillin hypersensitivity. He is currently co-director of the Post-Graduate Medical School course in allergy and clinical immunology.

'63 | Abraham N. Lieberman
Faculty Practice Office
566 First Ave., NYC 10016

"Dear Friends and Fans of the Column:

No, I did not oversleep the deadline. Some person in the *Medical Quarterly* did not inform me of the deadline and I happily continued to hoard news of the class. This must be the same person who, in an effort to generate news, sent out postal cards to all 128 class members with my name on it. Unfortunately, with the wrong address. Careful reading of the column will reveal that I moved from Wayne Avenue in the Bronx 16 months ago. Seven out of 128 people replied; at least that was the number of cards which were ultimately received. This means that I don't have to relate my latest conversations with Marty Kahn nor fill you in on the latest escapades of Cliff Harris who, by the way, has just built a new swimming pool in his home. You may get some idea of the size of this when you realize that the Seventh Fleet spent the night there on the way to Hawaii. Speaking of Marty Kahn, Martin has bought a home in Scarsdale and is now spending his spare hours working for the carpenters, plumbers and assorted handymen who come to consult on his purchase.

Larry Chessin reports that he is clinical assistant professor of medicine at the University of Rochester and he is the head of the infectious disease unit of the Genesee Hospital in Rochester. He is in the practice of internal medicine with a group. Larry has two children — Danny, age 11, and Margie, almost 4.

Judianne Densen-Gerber writes that she has recently finished the first semester as associate visiting professor of law at the University of Utah, to which she commutes (?). Knowing Judy, if she says she commutes — she commutes. It probably beats driving down on the Major Deegan. She had her fourth child in July. Judianne is the executive director of Odyssey House and is doing an outstanding job in combating drug addiction. Judianne has recently finished a book entitled, "We Mainline Dreams," which is part autobiographical, telling of her work in Odyssey House. Odyssey House is a unique program in a number of ways. No sick person is turned away and to this day it does not tolerate

waiting lists. Odyssey House tolerates neither methadone nor other maintenance drugs. The book, "We Mainline Dreams," is an existential history of the first years, parts written by Judianne and the rest written by patients. The book is published by Doubleday.

Alan Friedman reports that he is on the full-time staff of the Albert Einstein/Montefiore Hospital in ophthalmology. He is a consultant ophthalmologist at the Bronx Zoo. (Those were his words, not mine. But I must admit it is something that I would have said.) Alan has four children. Both he and Judianne are active participants in Zero Population Growth.

Herbie Lipschitz, (you didn't write, Herbie, but we found out anyway) is in the practice of internal medicine in Watchung, New Jersey. Herbie has two children.

David Kanef writes: "Great idea, Abe," obviously thinking that it was my idea to send out postal cards with the wrong address to other members of the class. David is in the practice of pediatrics in West Haverstraw, N.Y., with Larry Shapiro, Class of '62, and one non-NYU associate. David is living in New York City with his wife, Elaine, and three beautiful children, Mike, 8; Matt, 6; and Ruth, 2. He is a clinical instructor at Albert Einstein where he took his residency training, and he is on the staff of Letchworth Village State Hospital. David says that he maintains mail contact with Ed Sills who is now in Baltimore and Marty Janis and Rudy Brody who are both in California. He concludes by telling me to keep up the good work. Next time I'll address postal cards to all members of the class but mail them to wrong addresses.

Les Krasnogor writes that he was board-certified in pulmonary diseases in the fall of 1972, and that he is the secretary of the chest section of the Connecticut State Medical Society.

John J. Stine, my old roommate, writes that he has a new addition — Joshua, a future charismatic leader of the USA. John was always good with words; keep it up and you'll get the column. John has an unusual hobby (his words, not mine); he is in psychoanalytic training at the New York Psychoanalytic Institute. He has an appointment as attending psychiatrist at Montefiore Hospital. John is currently writing a book about child development.

Martin Wininger writes that he is married to Dr. Carol Manberg, New York Medical College, Class of 1970. They have one son, Aaron Richard, 9-months-old. Marty is practicing dermatology in Elmhurst, Queens.

Mike Zimmerman writes that he is with the department of pathology at the University of Pennsylvania. He is working on

a Ph.D. thesis on anthropology on the paleopathology of mummies. He and his wife are expecting their second child next month. At night he watches old Boris Karloff reruns.

Mike Ruoff reports that he saw Mike Gang and Martin Kolodny, both of whom were at one of the gastroenterology meetings in New York.

Phil Yarnell was at the reunion. Phil is an assistant professor in neurology at the University of Colorado Medical Center and he is the director of the neurology service at the Denver General Hospital.

I report that I was unable to attend the class reunion because my wife, Ina, had just given birth to our fourth child, Michael Scott. We, too, believe in Zero Population Growth."

1125 Graham Road
Florissant, Missouri 63031

Paul Fitzgerald is practicing orthopedic surgery in Lynchburg, Virginia, and is an instructor at the University of Virginia in Charlottesville.

Bob Heilen has become board certified in orthopedic surgery.

Stuart Menn is now assistant professor of medicine at the University of California School of Medicine at San Diego. He is director of the intensive care unit, and his main interest is in acid base physiology. Stu writes that he is still a bachelor.

Norman Talpins practices vascular and general surgery in Hollywood, Florida. He has three children and is now board-certified in general surgery.

Carlotta Lief Schuster is senior staff psychiatrist in charge of the adolescent unit at the Silver Hill Foundation, a private non-profit residential treatment center in New Canaan, Conn. She and her husband and two-year-old daughter live in Wilton, Conn.

Larry Jassie, wife and two daughters, are living in Belgrade, Yugoslavia, where he is regional medical officer for the Department of State.

Ilene Raisfeld now lives at Atlantic Beach, Long Island, with husband, Larry, and two children; and is still full time at NYU in internal medicine.

Edward Elkin is now on the staff of the adolescent services department at Mount Sinai Hospital in New York City. He lives on East 77th Street with his wife, Joan.

Imre Toth practices medicine and gastroenterology in Marlborough, Mass. He is on the hematology service at Boston V.A. Hospital. He is married and has three children, and is also board-certified.

Bruce Nitsberg is presently practicing rheumatology in Long Beach, New York, and is a member of the rheumatic disease staff at the Hospital for Special Surgery in

Manhattan. He is also rheumatic disease consultant at Long Beach Hospital.

Edward Curtis is assistant professor of medicine at Presbyterian-University Hospital at the University of Pittsburgh. He is director of the heart station there. He and wife, Zelda, have two daughters.

Richard Auerbach is in the private practice of radiology at Bremerton, Washington, where he lives with wife, Sharon, and infant daughter.

Elaine Hilberman is still in Chapel Hill, N.C. She now practices psychiatry, and is on the faculty of the University of North Carolina School of Medicine in the department of psychiatry. Her main areas of interest are feminism, sex-role socialization and discrimination against women as parents.

Lee Reichman is now director of the bureau of tuberculosis of the New York City Health Department, and also director of the bureau of chronic disease control; and chairman of the board of respiratory therapy of the City of New York. He received a Master of Public Health at John Hopkins, and has his boards in internal medicine. He is on the staff at Columbia P.&S., and does his clinical work as assistant visiting professor at Harlem Hospital Center.

Howard Goldberg is practicing dermatology in Lynn, Mass. He is clinical instructor of dermatology at Tufts University School of Medicine.

Sam Bailine is living in Port Washington, N.Y. He sends me no other information about himself.

Don Plevy practices internal medicine in Fort Lauderdale, Florida.

'66 | Ronald C. Golinger,
298 Andrew Drive
Newton, Pennsylvania 18940

Your devoted class agent made a last minute change of plans and, contrary to previous reports, is now in the private practice of surgery at 433 Bellevue (of course) Avenue, Trenton, New Jersey. I am wielding the cold steel at The Mercer Hospital in beautiful, downtown Trenton. The Pennsylvania side of the Delaware is quite lovely and conducive to quiet family living. John Kruger does the gallinaceous gastroscopies here and Nancy is a clinical specialist in the Mercer nursing department. My travels through the northeast in search of a practice brought me to Hackettstown, N.J. where Hal Lappin and his fine family are nicely settled. Hal is doing well in his eye practice. Wife, Dee, does a big share of the office work. Believe it or not, I also saw, with my very own eyes, mind you, Steve Chernay; a bit of Park Avenue in Fishkill, N.Y. (Orchard Place, Fishkill, N.Y. 12524). His wife, Marilyn, and daughter, Melissa Hayley, are lovely. Steve met his bride at the Heffnar Clinic in Texas. While he battles

against *rhinorrhea suburbanorum*, Marilyn does some art and modeling.

Steve, Marlene and Adam Brown live at 6391 Douglas Street, Pittsburgh, Pa. 15217. Steve, after an intensive "time-cost-motion" study has forsaken his Boston practice and has become Commissioner and Supreme Tzar of Moonlighting of Pittsburgh. His Royal Moonness will take some time off from work to continue his plastics training.

Ellis Friedman should be out of the USAF by the time you read this and in the practice of orthopedic surgery in Reading, Pa. New Address: 355 Lackawanna St., Reading, Pa. 19601. Ellis informed me that Hal Skalka is now assistant professor of ophthalmology at the U. of Alabama. The Skalkas own Dixiefrost Kennels and breed Samoyeds (all white, little bigger than a huskie). You'll feed 'em grits, Hal?

Lew Holzman writes that he has moved to Japan and had to extend his AF tour until Dec. 1974 to get the assignment. He says: "Am enjoying Japan but wish I had more time for things like kendo . . . passed the ortho board . . . got my private pilot's license. In spite of spending all day and night last Sunday in the OR fixing 3 motorcyclists with total of 10 fractures, I am continuing to enjoy riding my 450 cc. Honda." Do you wear a black leather scrub suit, Lew? New address: Major Lewis C. Holzman, USAF Hospital Tachikawa, P.S.C. Box 4406, APO San Francisco, 96323.

Alex Stone is full time in surgery at Long Island Jewish Hospital. New address: 36 Fairview, Great Neck, N.Y. 11023. Somewhere in the midst of his tour with the Marines Alex shed his moustache and acquired a strong affection for crabbing. We wonder if the parking lot guard at LIJ enjoys being saluted.

And speaking of salutes, hats off to Sandy Kammerman who won the Triple Crown this year from the Class of '66! She was married (on February 25, 1973, to Sy Hyman who is chairman of the board and/or president of multiple large corporations), she passed the medicine boards, and she is assistant professor of medicine at NYU. Sandy is attending endocrinologist at UH and BH and is associate director of the clinical research unit (K6) at BH. She is assistant editor of the *American Journal of the Medical Sciences* and is recording secretary of the NYU Medical Alumni Association. Address: 220 Central Park South, N.Y. 10019.

Syl Fribourg has opened his practice of obstetrics-gynecology-infertility in the Upland Medical Group For Women, Inc., Suite L, 360 East Seventh St., Upland, California 91786. He passed part I of the boards and is very happy with the area and with his associates. Family is fine.

Anybody seen Toby Engel, Fay Frank, Norm Kahan or Steve Atherton? Does Ron Mineo still have a crew cut? Does Mike Kondell still have hair?

'70 | Eugene J. Fierman
149 Fuller St.
Brookline, Mass. 02146

We've heard from Larry Frank via his wife, Nancy. Larry finished his first year of medical residency at Metropolitan Hospital in New York, took a two-week vacation hiking in the Canadian and American Rockies and was then sent to Albrook Air Force Base in the Canal Zone, where he and Nancy live in Panama City (address is Box 324, A.P.O., New York 09825). Nancy doesn't mention much about Army life, but Larry's busy swimming, motorcycling, scuba diving and learning to fly a plane. He's spent some time in the jungle (eating armadillo and iguana!) and hopes to go to the Galapagos Islands for a vacation.

I received announcement of Sharon Drager's marriage to Dr. Ernest Ivan Katler on June 24th in New York, and hope to hear more details.

As for me, I've finished my tour in the PHS and have moved to Boston, where I've started my psychiatric residency at the Massachusetts Mental Health Center. So send all mail to 149 Fuller Street, Brookline, Massachusetts 02146. Janet finished up her job at the Department of Commerce, and just started law school at Boston University.

I hope to be hearing more news from the class!

'71 | Bob Press
33 Pond Ave.,
Brookline, Mass. 02146

On June 25, I began my internship at Beth Israel (B.I.) Hospital. At 8 a.m., I was informed by my resident that "it wouldn't be a bad day—the attendings would only admit emergencies." At 6 a.m. the next morning, five admissions later, I thought of Jack Resnick (PHS—Bladenboro, N.C.), who has taken up flying and bought a two-seater airplane. If I only had that airplane, I thought, I'd fly somewhere—anywhere but Boston.

By mid-July, I was better adapted. An 80-year-old woman appeared one sunny day, and, when I began taking a history, I learned to my chagrin that she was actually at B.I. to visit her mother, a patient of mine. I began referring all patients under 60 years of age to the pediatrics floor.

Speaking of pediatrics, two more, '71'ers have provided new clientele for the pediatrician. Eileen and John Schulhoff (Surg. Res., Presbyterian-VA, Pitt.) had a son, Matthew, last spring. Then on June 24, Annette Cable presented Ritch (Nat'l Cancer Inst.) with a 9-lb., 13 oz., package. Displaying the class trait of originality,

the Cables named the boy — you guessed it — Matthew.

By August, I had a fairly good handle on things. Only one and eleven-twelfths more years until I can live like a human being again. Down in the air-conditioned radiology department was **Marc Homer** (125 Chiswick Road, Brighton, Mass. 02135), keeping banker's hours (while the fans on the medicine floors faithfully

circulated the 95-degree air). The cool air seems to have gone to Marc's head, and he has announced his engagement to Diane Bernstein. The two will be wed on November 17. Diane is beginning graduate school in social work at Boston University.

Diane and Marc attended the **Peter Kent-Shirley Sparks** marriage on September 15. Also looking on were **Steve Hirsch-**

berg (2nd-year med. res., Bronx Municipal Hospital Center) and yours truly. Steve will be a Navy man next year at this time. He informed me that **Joe Wildman** is now back at Bellevue for his second-year medicine residency.

It's now mid-September and I'm so efficient that I actually had time to write this column (one week late). Maybe next time I'll even meet my deadline.

OBITUARIES

William Francis Shaw '04, of San Francisco, Calif., died May 6, aged 94 years. He was city prison physician for many years; formerly health officer of Siskiyou County.

Edmund George Silverman '07, of Brooklyn, N.Y., died July 12, aged 86 years. He was a consulting physician at Kings County Hospital Center; a diplomate of the American Board of Internal Medicine; member of the Medical Society of the State of New York and the AMA.

Joseph Blinder '11 of Brooklyn, N.Y., died July 4, aged 87 years. He was a member of the Medical Society of the County of Kings, the Medical Society of the State of New York and the AMA.

William Stanton Martens '12, of Peekskill, N.Y., died April 15, aged 81 years. He was an honorary member of the medical staff at Peekskill Community Hospital; member of the Westchester County Medical Society, the Medical Society of the State of New York, and the AMA.

Clymont MacArthur '21, of Califon, N.J., died April 7, aged 78 years.

Henry Nathaniel Gross '23, of Brooklyn, N.Y., died June 5, aged 74 years. He was an associate obstetrician and gynecologist emeritus at Maimonides Hospital of Brooklyn; a Fellow of the American College of Obstetricians and Gynecologists; member of the American Society of Clinical Hypnosis, the Medical Society of the County of Kings, the Medical Society of the State of New York and the AMA.

Mortimer M. Kopp '25, of New York City, died July 20, aged 72 years. He was an attending plastic surgeon at Brooklyn Women's, Lutheran, Wickersham and Medical Arts Center hospitals; an associate attending otolaryngologist at Prospect Heights Hospital Pavilion and Long Island

College Hospitals, a staff otolaryngologist at Flatbush General Hospital, and a consulting plastic surgeon at Kingsbrook Jewish Medical Center and Samaritan Hospital of Brooklyn. He was a diplomate of the American Board of Otolaryngology, a Fellow of the International College of Surgeons; member of the American Academy of Ophthalmology and Otolaryngology, the Medical Society of the County of Kings, the Medical Society of the State of New York and the AMA.

John Joseph Quin '26, of Sarasota, Fla., died April 6, aged 70 years. He formerly practiced in Jersey City, N.J., where he was on the staff of the Christ Hospital.

Arthur M. Freund '27, of The Bronx, N.Y., died April 18, aged 72 years. He was a general practitioner on the medical staff at University Heights Hospital and a clinical assistant physician at Bronx-Lebanon Hospital Center; a member of the American Academy of General Practice, the Bronx County Medical Society, the Medical Society of the State of New York and the AMA.

Louis Schneider '28, of Scarsdale, N.Y., died May 11, aged 69 years. Retired, he was a physician (inactive) at Vanderbilt Clinic and an honorary member of the medical staff at Mount Vernon Hospital. He was a diplomate of the American Board of Internal Medicine, a fellow of the American College of Physicians, and a member of the American Thoracic Society, the Bronx County Medical Society, the Medical Society of the State of New York, and the AMA.

Nicholas D. Strusinski '28, of Jackson Heights, N.Y., died March 16, aged 69 years. He was certified by the American Board of Radiology; veteran of World War II.

Francis Henry Keckeissen '31, of The Bronx, N.Y., died March 7, aged 68 years. He was an honorary senior surgeon at St. Vincent's Hospital and Medical Center; member of the Bronx County Medical Society, the Medical Society of the State of New York, and the AMA.

Jack Levin '36, of Freehold, N.J., died July 17, aged 60 years. He was medical director of the Monmouth Medical Center and clinical professor of medicine at Hahnemann Medical School in Philadelphia. He founded the coronary care unit of the Medical Center in 1966; was a diplomate of the American Board of Internal Medicine and a fellow of the American College of Physicians.

Sebastian F. Casalaina '37, of Patton, Calif., died Dec., 13, 1972, aged 62 years.

Arthur Francis Wright '38, of Hempstead, N.Y., died July 30, aged 60 years. He was a consulting obstetrician and gynecologist at Nassau and South Nassau Communities Hospital and a consulting obstetrician at Mercy Hospital; a diplomate of the American Board of Obstetrics and Gynecology; a Fellow of the American College of Obstetricians and Gynecologists; member of the Nassau County Medical Society, the Medical Society of the State of New York, and the AMA.

Irwin M. Buck '40, of Beverly Hills, Calif., died March 14, aged 56 years. He was certified by the American Board of Obstetrics and Gynecology; affiliated with the Los Angeles County General and St. Vincent's hospitals in Los Angeles.

Charles Arthur Speer '40, of Cranford, N.J., died April 17, aged 58 years. He was associated with the Muhlenberg Hospital in Plainfield; veteran of World War II.

Leslie Irwin '41, of Fresno, Calif., died May 9, aged 56 years. He was certified by the American Board of Internal Medicine; on the faculty of the University of California, Los Angeles, School of Medicine; served on the staffs of St. Mary's and Memorial hospitals in Long Beach; veteran of World War II.

Samuel J. Phillips '56, of New York City, died March 28, aged 56 years. He was an assistant attending radiologist at Memorial Hospital for Cancer and Allied Diseases; member of the New York County Medical Society, the Medical Society of the State of New York, and the AMA.
