FACULTY.

ISAAC E. TAYLOR, M.D., Emeritus Professor of Obstetrics and the Diseases of Women and Children, and President of the College.

JAMES R. WOOD, M.D., LL.D., Emeritus Professor of Surgery.

FORDYCE BARKER, M.D., Professor of Clinical Midwifery.

FRANK H. HAMILTON, M.D., Professor of Practice of Surgery with Operations and Clinical Surgery.

LEWIS A. SATRE, M.D., Professor of Orthopedic Surgery and Clinical Surgery.

ALEXANDER R. MOTT, M.D., Professor of Surgical Anatomy with Operations and Clinical Surgery.

W. H. VAN BUREN, M.D., Professor of Principles of Surgery with Diseases of the Genito-Urinary System and Clinical Surgery.

BENJAMIN W. MCCREADY, M.D., WILLIAM A. HAMMOND, M.D., Professor of Materia Medica and Therapeutics and Professor of Diseases of the Mind and Nervous System. Clinical Medicine.

REV. ALFRED B. BEACH, D.D., LUCIEN DAMAINVILLE, M.D., Chaplain of the College. Assistant to the Chair of Chemistry, in charge of the Practical Laboratory.

J. LEWIS SMITH, M.D., A. W. WILKINSON, M.D., REUBEN E. VANCE, M.D., Assistant to the Chair of Chemistry, and Assistant to the Chair of Diseases of the Mind and Nervous System.
diseases, etc., by the Institutions on Blackwell’s Island. Prof. Wood will also continue to give a large portion of the Clinical course on Surgery. All the lectures in this College are given either in the Amphitheatre of the BELLEVUE hospital and the CHARITY HOSPITAL, or in the College Lecture Room within the Hospital grounds. In addition to the regular Surgical lectures, Prof. Noyes will continue to give, as heretofore, a systematic course of lectures, in the College, on Diseases of the Eye and Ear. During the Winter Session there is a vacation from December 25th to January 1st, inclusive.

PLAN OF INSTRUCTION.—The distinctive feature of the BELLEVUE hospital medical college is the union of clinical and didactic teaching. The plan is to combine to the fullest possible extent these two methods of instruction, not devoting attention to either method to the detriment of the other, but striving to so incorporate them with each other as to give to both the utmost practicable efficiency. Of the advantages of this plan, ample evidence has been afforded by the experience of the eight years since the establishment of this College. These advantages are applicable to students attending their first course of lectures not less than to those who have already attended one or more courses; and so long as the first-course student is expected to listen to didactic lectures on Practical Medicine, Surgery, and Obstetrics, he should, at the same time, observe cases of disease, study practically the facts connected with gestation and labor, and witness surgical operations.

RESOURCES FOR CLINICAL INSTRUCTION, ETC.

BELLEVUE HOSPITAL receives annually from ten to twelve thousand patients. This Hospital embraces a lying-in department, the annual number of births exceeding five hundred. Medical and Surgical cases of all descriptions are received, exclusive of contagious diseases. Cases of typhus fever are no longer admitted into this Hospital, but are transferred to the Fever Hospital on Blackwell’s Island. Cases of smallpox are treated at the Small Pox Hospital on Blackwell’s Island. Of the Professors constituting the Faculty of the BELLEVUE Hospital Medical College, twelve are connected with the BELLEVUE Hospital either as Physicians, Surgeons, or Obstetricians. The CHARITY Hospital on Blackwell’s Island contains, usually, about one thousand patients; the larger proportion being affected with chronic diseases. In this Hospital are collected several hundred cases of syphilis, presenting all the different stages and varieties of this disease in both sexes. The field for the study of uterine diseases is immense, and clinical instruction here constitutes an important part of the regular course. Of the College Faculty, eight members are connected with this Hospital.

Medical Students are admitted to the BELLEVUE and CHARITY Hospital daily during the hours allotted to clinical teaching. All the important operations in surgery are performed publicly in the Hospital amphitheatres. Opportunities are also afforded for witnessing cases of labor and obstetrical operations, and illustrating practically the diseases peculiar to females.
FEES AND REGULATIONS FOR THE WINTER SESSION.

The aggregate fees for tickets to all the lectures during the Regular and the Preliminary term, including tickets for lectures at the Bellevue and Charity Hospital, amount to $140. Tickets for one or any number of the departments of instruction may be taken out separately. In addition to the fees for the tickets to the lectures, is a matriculation fee of $5. The matriculation ticket must be taken out before the tickets to any of the lectures, or the Hospital ticket, can be obtained. The graduation fee is $30.

The fee for the dissecting ticket is $10. This covers all the expenses of the dissecting room. There is no expense for subjects, nor are there any incidental charges.

Students who have attended two full courses of lectures in other accredited medical colleges receive all the tickets to the lectures of this College, exclusive of the matriculation and the dissecting ticket, for $70. Students having attended two full courses of lectures in this College, or after attendance on one full course in this College, having previously attended one full course in some other accredited college, are required to matriculate only. Graduates in good standing of other accredited medical colleges, after three years, are required to matriculate only. The three years recognized are considered as ending with the Winter Session. Prior to the expiration of three years, the fee for a general ticket is $70.

Payment of fees, according to the foregoing regulations, is required in all cases, and the tickets must be taken out and paid for at the beginning of the Regular Term. The attention of students is particularly called to these rules respecting the payment of fees. Remission of fees, or deduction, and the taking of promissory notes from students, are interdicted by the by-laws of the College.

REQUIREMENTS FOR GRADUATION.

The requirements for graduation are: three years' pupillage with a regular physician in good standing, inclusive of the time of attendance at medical lectures; attendance on two full courses of lectures, the last being in this College; certificates of at least one course of Practical Anatomy, or Dissections; proper testimonials of character; an acceptable thesis in the handwriting of the candidate; and a satisfactory examination in each of the departments of instruction. Two full courses of lectures are absolutely required, and no period of practice is taken as an equivalent for one course. The candidate must be twenty-one years of age.

There will be two regular examinations for the degree at the College; one at the close of the Winter Session, and the other during the first week in October. Undergraduates, who have complied with all the requirements, may present themselves at either of these examinations, but they will not be examined at any other time.

The requirements for an ad eundem degree in this College are: a diploma from an accredited medical school; satisfactory testimonial with respect to character and professional standing from regular physicians; and a satisfactory examination in the practical branches of medicine, surgery, and obstetrics. The Faculty will not grant an ad eundem degree to any graduate of over three years' standing who does not file with the Secretary a certificate of membership in some medical society entitled to representation in the American Medical Association. This rule will be invariable. Candidates for an ad eundem degree are expected to matriculate, to take out tickets for the Winter Session, to have attended lectures during the session, and to pay the graduation fee of $30. Graduates of three years' standing receive a ticket to all the lectures on payment of the matriculation fee.

The diploma of the Bellevue Hospital Medical College has been officially recognized by the Royal College of Surgeons, England, for those who have passed a regular matriculating examination in classics, mathematics, &c., at some recognized medical college. This examination is optional with the student, and will be given by the Faculty to all who desire it.

SUMMER SESSION.—RECITATIONS AND LECTURES.

The Summer Session of this College was instituted in 1866, with a view to make available for the Summer, as well as the Winter months, the resources of clinical teaching in which the City of New York abounds, and to enable the student to pursue his medical reading in the interval between the Winter Sessions, with the advantage of competent direction and daily recitations. The experience of three Summer Sessions has fully confirmed the belief that it will prove a highly important measure for the advancement of medical education. With a view to still further increase the facilities for study during the intervals between the regular courses of lectures, the Faculty have decided to conduct personally, during the Spring, Summer, and Fall, a class of recitations upon the seven departments entering into the regular curriculum. This will be organized in the Summer of 1870 by seven members of the regular Faculty with an efficient corps of assistants. These recitations will be conducted daily (with an intermission during the months of July and August), from the end of the Winter Session till the opening of the next regular course of lectures. The Faculty, in thus establishing on a permanent basis their plan of a full collegiate year, feel confident that they will render their instruction from books during the Summer, as complete and efficient as their teaching by didactic and clinical lectures in the Winter.

This change will render the recitations the great feature of the Summer course; but it will be supplemented, as before, by lectures on special subjects, which will be announced during the Winter.
ANNUAL CIRCULAR.

REGISTRATION TERMS.—There will be two registration-terms; the first from March 15th to July 1st, and the second from September 1st to the opening of the Regular Session. During these terms, regular clinical lectures will be given, and certain of the special courses of lectures will be continued. The Chemical Laboratory will also be open for private instruction. The Dissecting Room will remain open until the first of May; and the Demonstrator's ticket issued for dissections during this term will be valid for the ensuing Winter Session.

The fees for the Summer Session will be as follows:

Recitations and Clinics .......................... $35.00
Full Summer Course of Lectures and Recitations ....... 90.00
Special Courses in Summer (each) ................. 10.00
Chemical Laboratory ................................ 25.00
Dissecting (Ticket good for the following Winter) ... 10.00
Full Summer and Winter Courses (except Chemical Laboratory) ........................................ 175.00

Students will be required to matriculate (the ticket good for the following Winter) before any of the tickets are taken. Alumni, and those who have attended two full Winter courses at the College, will be admitted to all the lectures in the Summer and Winter by matriculating only.

EXPENSES OF LIVING IN NEW YORK, &c.

The expenses of living in the City of New York will, of course, vary according to the views and habits of the student. The necessary expenses need not exceed those in the smaller cities, or in most large villages. At the present time, good board may be had at a convenient distance from the College at from $5 to $7 per week. Pains are taken to provide a list of boarding houses in the vicinity of Bellevue Hospital, to suit the wishes and means of students. The Janitor will be prepared to secure satisfactory accommodations without any delay for those who have matriculated at the College.

Bellevue Hospital is situated on the East River, between Twenty-sixth and Twenty-eighth Streets. In coming to the Hospital from the lower part of the city, the most convenient mode is to take one of the street-cars, passing every three or four minutes, either on the Second, Third, or Fourth Avenues, getting out at Twenty-sixth Street. The distance from either of these avenues to the Hospital is short. The entrance to the Hospital is on Twenty-sixth Street, near the East River.

Persons desiring further information are requested to communicate with the Secretary of the Faculty, Prof. Azemr Pills, Jr., Bellevue Hospital Medical College, New York.

**BELLEVUE HOSPITAL MEDICAL COLLEGE**

---

**O. E. SOCIETAS,**

**CONSTITUTA ANNO DOMINI MCCCLXIV.**

**Veritas via—successus propositum.**

Members are requested to send their addresses to the President, E. C. HARWOOD,
M.D., 184 West Forty-sixth Street, New York City.

Annual Reunion last week in February.

**OFFICERS FOR THE YEAR 1869—70.**

- **President.** E. C. HARWOOD, M.D.
- **Vice President.** SOMERVILLE P. HAMMOND
- **Secretary.** C. M. HOBBS
- **Treasurer.** J. W. McWHINNIE
The Alumni Association of BELLEVUE HOSPITAL MEDICAL COLLEGE.

OFFICERS FOR THE YEAR 1869-70.

President............................... Leroy M. Yale, M. D.
Vice-President.......................... Henry A. Vance, M. D.
Recording Secretary.................... Frank H. Bowsworth, M. D.
Corresponding Secretary................. H. Raphael, M. D.
Treasurer............................... E. L. Molla, M. D.

Executive Committee.

L. B. Irish, M. D., E. L. Molla, M. D.,
James F. Ferguson, M. D., Frederick A. Castle, M. D.,
T. R. Pooley, M. D., Wm. T. Lewis, M. D.,
Eucharis L. Leale, M. D., Jno. W. Southack, Jr., M. D.,
G. W. Terriberry, M. D., Jno. W. Pinkham, M. D.,
Joseph Cushman, M. D., Peter R. Contetlott, M. D.,
Ira B. Read, M. D., Thaddeus B. Cross, M. D.

Every Graduate of the Bellevue Hospital Medical College, in good and regular standing, is considered a member of the Association.

The annual meeting of the Association is held the day before the Commencement of the Bellevue Hospital Medical College.

Professor James E. Wood offers to the Association a prize of one hundred dollars for the best essay upon any subject connected with Surgical Pathology or Operative Surgery, to be awarded at the annual meeting in 1870, at which time the successful essay is to be read. The committee to examine the essays and award the prize is to consist of Professors W. H. Van Buren, Austin Flint, and Stephen Smith. Each essay, designated by some motto or device, must be sent to Professor W. H. Van Buren, on or before the first day of February, 1870, accompanied by a sealed envelope, endorsed with the same motto or device, and containing the author's name and address.

FACULTY PRIZES.

Prizes are offered by two members of the Faculty—Professors Wood and Mott—for the best preparations relating to Surgical Anatomy, to be competed for by students in any of the medical schools of New York and Brooklyn. The prizes offered by Prof. Wood, in addition to the prize for the Alumni Association, are $50, with a diploma, for the best preparation, and $25, with a diploma, for a preparation ranking second in excellence. The prize offered by Professor Mott is a complete case of surgical instruments, of the value of $100, for the best preparation. These prizes are adjudged by the Professors of Surgery in the several schools.
LIST OF TEXT-BOOKS.

PRACTICE OF MEDICINE.—Flint’s Practice; Bennett’s Clinical Medicine; Flint, Physical Exploration; Flint, Diseases of the Heart.

ORTHOPEDIC SURGERY.—Sayre, on Club Foot; Little, on Deformities; Bigo, Orthopaxy.

SURGICAL ANATOMY.—MacIse, Velpeau by Mott.

PRINCIPLES OF SURGERY.—Erichsen, Holmes.

DISEASES OF THE URINARY SYSTEM.—Roberts.

OBSTETRICS.—Elliot, Obstetric Clinic; Cazaux, Bedford.

DISEASES OF WOMEN.—Scanzoni, Grailly Hewitt, Thomas.

DISEASES OF CHILDREN.—Smith, West, Bouchut, Condie.

PHYSIOLOGY.—Flint, Jr., Dalton.

MICROSCOPICAL ANATOMY.—Köllicker.

ANATOMY.—Gray, Wilson, Quain.

CHEMISTRY.—Brande & Taylor; Bowman, Medical Chemistry.

TOXICOLOGY, &c.—Otto, on Poisons; Taylor, on Poisons.

DISEASES OF THE NERVOUS SYSTEM.—Meyers, Electricity in its Relations to Practical Medicine, Translated and Edited by Hammond; Maudsley’s Physiology and Pathology of the Mind.

OPHTHALMOLOGY.—Wells, Stelwag, Williams, Zander, on the Ophthalmoscope.

MORBID ANATOMY.—Jones & Sievering; Virchow, Cellular Pathology.

MOTT MEMORIAL FREE MEDICAL LIBRARY.

This Library, founded by the widow of the late Valentine Mott, comprising over three thousand volumes, is located at No. 64 Madison Avenue. It contains the entire medical library of the late Prof. Mott, with about eight hundred volumes contributed by Prof. A. B. Mott, and various other contributions. The number of volumes will be constantly increased by donations and purchases.

The library will be open to students of medicine and practitioners, from ten o’clock A. M. to ten P. M., throughout the year. Tickets may be obtained from Prof. Mott, on application at his office, No. 62 Madison Avenue, between 9 and 12 A. M.
