Bellevue Hospital Medical College,
CITY OF NEW YORK.

SUMMER SESSION, 1871.

ISAAC E. TAYLOR, M. D.,
Emeritus Professor of Obstetrics and the Diseases of Women and Children, and President of the College.

JAMES R. WOOD, M. D., LL. D.,
Emeritus Professor of Surgery.

FORDYCE BARKER, M. D.,
Professor of Clinical Midwifery and Diseases of Women.

FRANK H. HAMILTON, M. D., LL. D.,
Professor of Practice of Surgery with Operations, and Clinical Surgery.

LEWIS A. SAYRE, M. D.,
Professor of Orthopedic Surgery and Clinical Surgery.

ALEXANDER B. MOTT, M. D.,
Professor of Surgical Anatomy with Operations, and Clinical Surgery.

W. H. VAN BUREN, M. D.,
Professor of Principles of Surgery with Diseases of the Genito-Urinary System, and Clinical Surgery.

Benjamin W. McCready, M. D.,
Professor of Materia Medica and Therapeutics, and Clinical Medicine.

STEPHEN SMITH, M. D.,
Professor of Descriptive and Comparative Anatomy, and Clinical Surgery.

AUSTIN FLINT, M. D.,
Professor of the Principles and Practice of Medicine, and Clinical Medicine.

R. OGDEN DOREMUS, M. D.,
Professor of Chemistry and Toxicology.

AUSTIN FLINT, Jr., M. D.,
Professor of Physiology and Microscopy, and Secretary of the Faculty.

W. H. VAN BUREN, M. D.,
Professor of Principles of Surgery with Diseases of the Genito-Urinary System, and Clinical Surgery.

ALEXANDER B. MOTT, M. D.,
Professor of Surgical Anatomy with Operations, and Clinical Surgery.

HENRY D. NOYES, M. D.,
Surgeon to the Charity Hospital, Professor of Ophthalmology.

J. LEWIS SMITH, M. D.,
Physician to the Charity Hospital, Professor of Morbid Anatomy.

LECTURERS ON SPECIAL SUBJECTS.

Dr. W. M. POLK.

Dr. E. L. KEYES.

Dr. E. S. DUNSTER.

Dr. F. A. CASTLE.

Dr. N. R. MOSELEY, Demonstrator of Anatomy.

Dr. A. W. WILKINSON.

INSTRUCTORS IN THE SUMMER RECITATION CLASS.

Principles and Practice of Medicine:

Materia Medica and Therapeutics:

Physiology and Microscopy:

Anatomy:

Chemistry and Toxicology:
CIRCULAR.

The Faculty of the BELLEVUE HOSPITAL MEDICAL COLLEGE respectfully invite the attention of the medical profession and students of medicine to the advantages afforded by the Summer Session in this Institution. This Session was first instituted in 1866, for the purpose of presenting to physicians and medical students an opportunity for studying certain important special departments much more fully than is possible during the regular Winter courses of lectures, and also in the hope of securing for students more efficient and systematic teaching in the regular course of study than is usually obtained under a single preceptor. During the Summer Session, a daily clinic will be held, either at the Bellevue Hospital, in the College from the Out-door Department of the Bellevue Hospital, or at the New York Eye Infirmary. Regular recitations in the seven departments constituting the ordinary curriculum of teaching will be conducted by a corps of Instructors appointed by the faculty. The Dissecting Room will remain open until about the first of May, and the Students' Chemical Laboratory, under the charge of Dr. A. W. Wilkinson, Assistant to the Chair of Chemistry, will be open during the entire Summer Session.

SUMMER RECITATION CLASS.

In organizing the Summer Recitation Class upon its present basis, it is the aim of the Faculty to secure for the student the most efficient and thorough instruction in the regular course of study. Recitations will be held by the Instructors daily. These recitations will be made from text-books; and the Instructors will endeavor to elucidate all questions that are not readily comprehended by the students. In addition, the students are expected to attend the regular Clinical lectures. They will also have an opportunity of dissecting, and of taking private instruction in Practical Chemistry in the Laboratory. The Professor of the Principles and Practice of Medicine, in addition to the regular recitations, will conduct a class in Diagnosis in the Hospital. In this class, students are required to present reports of cases that have been assigned to them, giving the diagnosis, treatment, &c.—a method of instruction which has been found very useful in giving the student a practical familiarity with disease.

The Summer Course will be divided into two terms: the first extending from March 19th to July 1st, and the second, from September 1st to the opening of the Regular Session. The establishment of this course, in connection with the Regular Winter Session, will carry out, even more fully than in previous years, the idea of a full collegiate year, that has been entertained by the Faculty from the very organization of the College. The following schedule gives substantially the arrangement of the recitations and lectures for the Summer of 1871, though it may be modified at the opening of the Session in some of its unimportant details:

REGULAR CLINICAL LECTURES.

During the Summer Session, Clinical Lectures will be delivered in the Bellevue Hospital, the College Building, from the Out-door Department, and at the New York Eye Infirmary. Thus the most important of the Clinical Lectures given during the Regular Term will be continued through the Summer. It is hardly necessary to call attention again to the importance of the union of Clinical and Didactic teaching, which is now carried out to the fullest extent in the Summer as well as in the Winter Session.

The Students' Chemical Laboratory, under the charge of Dr. A. W. Wilkinson, Assistant to the Professor of Chemistry, will be open for those who may desire to form classes for the examination of Poisons, Urine, Urinary Calculi, Blood, Milk, &c. The dissecting room will remain open until about the first of May. The Demonstrator's ticket issued for the dissections during the Summer Session will be valid for the ensuing Winter Session.

Reproductions are the sole and exclusive property of The Lillian and Clarence de la Chapelle Medical Archives at NYU and may not be reproduced in any fashion or used for any purpose other than private scholarship without the express written consent of The Lillian and Clarence de la Chapelle Medical Archives at NYU.
FEES AND REGULATIONS.

The Fees for the Recitations, Lectures, &c., of the Summer Session, are as follows:

- Matriculation (the ticket valid for the following Winter) ........ $5 00
- Recitations and Clinics ........................................... 25 00
- Chemical Laboratory (including material) ........................... 25 00
- Dissecting (the ticket valid for the following Winter) ............ 10 00

A Matriculation ticket, which admits to all the Clinical Lectures, must be taken before any of the tickets are issued.

Attendance on the recitations during the Summer Session, in conjunction with attendance during the Winter Session, will be reckoned as a year of pupilage, and a certificate to that effect will be issued by the Secretary of the College. As inquiries are constantly being made upon these points, the Faculty desire it to be distinctly understood that the Summer Session has been instituted for the purpose of extending the course of medical instruction; and that this course cannot take the place, in any way, of one of the two regular courses required for graduation.

The Recitations will be held in the commodious building of the Bellevue Hospital Medical College, situated within the grounds of the Hospital, between 26th and 28th Streets, on the East River. Students and practitioners, on arriving in the city, are requested to report at the Hospital, and inquire for the Janitor of the College, who will aid them in procuring comfortable accommodations without delay. The entrance to the Hospital is on 26th Street.

For further information concerning the Summer or Winter Session, address

Prof. A. FLINT, Jr.,
Secretary of the Bellevue Hospital Medical College,

NEW YORK CITY.
