New York Post-Graduate Medical School

ANNOUNCEMENT OF THE DEPARTMENT OF

DERMATOLOGY

AND

SYPHILOLOGY

FOR THE ACADEMIC YEAR

1947 - 1948

Address all inquiries and applications to

THE REGISTRAR OF THE SCHOOL

303 East 20th Street

NEW YORK 3, N.Y.
NEW YORK POST-GRADUATE MEDICAL SCHOOL

GENERAL INFORMATION

HISTORY AND FACILITIES. The New York Post-Graduate Medical School and Hospital was incorporated in 1882, and chartered by the State in 1886 as "a school for the further instruction of persons already possessing the degree of doctor in medicine, and a hospital for the treatment of diseased and injured persons." The institution moved in 1894 to the present location on the corner of Second Avenue and Twentieth Street. The hospital now has 411 beds on all services, and 8,682 patients were admitted in 1946. The out-patient department, to which 199,531 patients' visits were made in 1946, provides a wealth of clinical material for study. The work of the clinical and research laboratories is closely related to the teaching program.

In 1930 the Reconstruction Hospital, at 100th Street and Central Park West, became a unit of the Post-Graduate. Its 50 beds are used especially for teaching traumatic surgery. There is also an active out-patient department.

In 1951, the New York Post-Graduate Medical School became, by formal agreement, a teaching unit of Columbia University. This agreement was terminated by mutual consent of the two institutions on May 1, 1947.

The administration of the Stuyvesant Square Hospital (formerly the N. Y. Skin and Cancer Hospital) was assumed by the Post-Graduate in 1934. Its buildings on Second Avenue between Nineteenth and Twentieth Streets are operated as the N. Y. SKIN AND CANCER UNIT of the Post-Graduate. The out-patient department of this unit occupies a five-story building in which the various subdivisions of dermatology and syphilology are practiced and taught in integrated units—clinical and laboratory diagnosis of syphilis and the dermatoses; topical, parenteral and ingestion therapy; follow-through therapy; physical therapy; minor dermatological surgery; mycology; allergy; histopathology; social service; investigation and management of syphilis and cutaneous malignancy; and photography. More than 155,000 patient visits each year ensure ample clinical material. There are laboratories for investigation and research, two hospital wards, private and semi-private rooms, four lecture rooms, several thousand lantern slides, and thousands of histopathological slides. The staff consists of over 175 physicians, nurses, technicians and clerks. There are three residencies.

A medical library of more than 17,000 volumes is maintained by the School for the use of matriculates and teaching staff. The leading medical journals of this country and many foreign journals are provided, as well as text and reference books.

ADMISSION REQUIREMENTS. In general, courses at the New York Post-Graduate Medical School are open to physicians in good standing who are graduates of medical schools approved by the American Medical Association and are licensed to practice medicine. Women physicians are admitted to all courses on the same basis as men.

TRAINING FOR SPECIALIZATION IN DERMATOLOGY AND SYMPHILIOLOGY

Training is provided for the physician who, after graduation from an approved medical school and an approved internship, desires to prepare himself adequately for the practice of dermatology and syphilology as a specialty. The program conforms to the requirements of the Advisory Board for Medical Specialties, the Council on Medical Education and Hospitals of the American Medical Association, and the American Board of Dermatology and Syphilology, which have established the standards upon which certification in this specialty is based.

This training occupies full time for three calendar years, except for an annual vacation of one month. The tuition fee is $800, payable the first year. There is no charge for tuition for the second or the third year. The matriculate attends the lecture courses and spends one-quarter of his time for from three to twelve months in each of the various sections of the department. He may be given at least one research problem involving study of basic sciences. In the third year he is given responsibility in the various departmental sections and in the clinical laboratories. Throughout the three years he attends the evening staff conferences, and the monthly evening meetings of the Section on Dermatology of the New York Academy of Medicine.

The regular opening date for this course is the first of October. Teaching is continuous throughout every day of the year, except Saturday afternoons, Sundays and holidays.

The School admits a maximum of twenty-two physicians to the three-year course each October. The class for this course beginning October 1, 1947 was filled before publication of this announcement. Applications for the class beginning October 1, 1948, will be considered after July 1, 1947.

This course of training is described on pages 5 through 12 of this announcement.

SEMINARS

Several seminars are also offered by the department, one designed for general practitioners, and others for qualified specialists in dermatology and syphilology and in pediatrics. These are described on pages 11 and 12.

ADMINISTRATIVE OFFICERS OF THE SCHOOL

HELEN L. WATTS, A.M., Registrar
MARY S. NEWCOMB, Assistant Registrar
JACQUELINE W. FELTER, A.B., Librarian
MARY E. ASKE, B.S., Assistant Librarian
TEACHING STAFF OF THE DEPARTMENT

Professor of Clinical Dermatology and Syphilology. MARION B. SULZBERGER (Executive Officer).

Professor Emeritus of Clinical Dermatology and Syphilology. GEORGE MILLER MACKEE, NATHAN SOREL.

Clinical Professors of Dermatology and Syphilology. E. W. ABRAMOWITZ, MAX SCHEER.

EUGENE F. TRAUB.

 Associate Clinical Professors of Dermatology and Syphilology. ANTHONY C. CIPOLLARO, GEORGE MILLER MACKEE.

Assistant Clinical Professors of Dermatology and Syphilology. MAX JESSNER, FRANCES PASCHER, THEODORE ROSENTHAL, CHARLES F. SIMS, JESSE A. TOLMACH.

Instructors. EUGENE F. TRAUB, NATHAN SOBEL.

Research Assistants. DAVID B. BALLIN, DAVID BLOOM, CHARLES LERNER, ROYAL M. MONTGOMERY, JOSEPH L. MORSE, HERBERT ROSENFELD, JACK WOLF.

Attending Dermatologist and Syphilologist to the Dispensary. BOTHO F. FELDEN.

Assistant Attending Dermatologist and Syphilologist to the Dispensary. FRANCES E. KARPLUK.

Attending Dermatologist and Syphilologist to the Hospital. ERNST L. KADISCH.

Consulting Dermatologist and Syphilologist to the Hospital. FRANK WISE.

Clinical Dermatology and Syphilology.

Section A—PROFESSORS TRAUB, SULZBERGER, JESSNER and TOLMACH and DRS. FRANK, SKEER and BARTHEL.

10-12 a.m., Monday, Wednesday and Friday.

Section B—PROFESSORS ABRAMOWITZ, CIPOLLARO, SOBEL and SHARLIT and DRS. NATHAN, L. C. RUBIN, FISHER and PICK.

2-4 p.m., Monday, Wednesday and Friday.

Section C—DR. WOLF, PROFESSORS SULZBERGER and JESSNER and DRS. NATHAN, L. C. RUBIN, FISHER and PICK.

10-12 a.m., Tuesday, Thursday and Saturday.

Section D—PROFESSORS SCHEER and SULZBERGER and DRS. BALLIN, LERNER, MONTGOMERY, BIBERSTEIN and WACHTEL.

2-4 p.m., Tuesday and Thursday.

Demonstration and examination of patients relative to the etiology, diagnosis, prognosis, and treatment of the usual range of skin diseases and of syphilis. Clinical manifestations, constitutional symptoms, characteristics of the eruption, laboratory methods of diagnosis, problems of general medical therapy, physical therapy, and topical applications are discussed in connection with each case.

Matriculates in their second and third years are assigned in groups of three to an instructor for a period of three months for the intensive study of selected cases and for the presentation of a case report at a staff conference.

DESCRIPTION OF THE COURSE
OF TRAINING FOR SPECIALIZATION

LECTURES ON BASIC SCIENCES, particularly in their relation to dermatology and syphilology. October 1, 1947 through April 28, 1948.

(a) Hematology. Ten lectures. Tuesday, 1-2 p.m. October 7 through December 16, 1947. PROFESSOR PASCHER.

(b) Bacteriology. Eight lectures. Monday, 8-9 a.m. October 6 through November 24, 1947. DR. FRANK.

(c) Embryology. Four lectures. Monday, 1-2 p.m. October 6 through October 28, 1947. PROFESSOR PASCHER.

(d) Chemistry and biochemistry. Twenty lectures. Wednesday, 1-2 p.m. December 3, 1947 through April 28, 1948. PROFESSOR SHARLIT and DR. HERMANN.

(e) Physiology. Four lectures. Thursday, 4-5 p.m. January 8 through January 29, 1948. DR. G. RUBIN.

(f) Pharmacology. Eight lectures. Wednesday, 4-5 p.m. October 1 through November 19, 1947. PROFESSOR PASCHER.

(g) Serology. Fifteen lectures. Monday, 4-5 p.m. October 6 through January 26, 1948. DR. REIN.

DIAGNOSIS AND MANAGEMENT OF SYPHILIS. PROFESSOR SOBEL and PROFESSOR ROSENTHAL (Director of Bureau of Social Hygiene, New York City Department of Health) and DRS. FRANKS and L. C. RUBIN.

1-2 p.m., Friday, from October 3, 1947 through January 23, 1948, and 4-5 p.m., Tuesday, from November 25, 1947 through February 10, 1948, and 9-10 a.m., Thursday, February 5 through May 27, 1948.

Lectures dealing with the historic and economic aspects of the disease, with syphilis as an infectious constitutional affection, with the epidemiology, morbidity and mortality questions, portals of infection, and clinical and laboratory methods of diagnosis, and a presentation of the many clinical aspects of the disease, including those involving the central nervous system and the viscera, and congenital syphilis; also criteria of cure, and discussion of syphilis and marriage. Forms of treatment, including the various drugs and fever therapy, are discussed in detail. Intramuscular and intravenous injections, cisternal puncture, and lumbar puncture are demonstrated. Lantern slides, clinical material, microscopic specimens, charts, and selected case studies are used to illustrate the lectures.

PRACTICAL INSTRUCTION IN THE DIAGNOSIS AND MANAGEMENT OF SYPHILIS (Part I). DRS. FRANKS, ROMANO, GARB, L. C. RUBIN and SPENCER.

Section A—10-12 a.m., Monday, Wednesday and Friday.
Section B—2-4 p.m., Monday, Wednesday and Friday.
Section C—10-12 a.m., Tuesday, Thursday and Saturday.
Section D—2-4 p.m., Tuesday and Thursday.

A practical course given at the Central Social Hygiene Clinic of the New York City Department of Health, where over one hundred syphilitic patients are studied and treated each morning. There are also numerous cases of lymphogranuloma venereum, granuloma inguinale, chancroid, etc.

PHYSICAL THERAPY AS APPLIED TO DISEASES OF THE SKIN. PROFESSOR CIPOLLARO and DRS. KLINE, and DR. MUTSCHELLER (Department of Radiology).

4-5 p.m., Friday, October 3, 1947 through March 18, 1948.

Twenty-four lectures and demonstrations dealing with the historical aspects and the practical application of X rays, radium, radon, grenz rays, ultraviolet rays, diathermy, electrolysis, high-frequency current or treatment of hypertrichosis, galvanism, cautery, solid carbon dioxide, balneotherapy, massage and other physical agents and methods used in the treatment of diseases of the skin including cutaneous malignant neoplasms. Emphasis is placed upon the limitations of and indications for the use of physical therapy in each group of disorders. Apparatus is demonstrated in detail. Several of the preliminary lectures are devoted to the physics of physical therapy.

PRACTICAL INSTRUCTION IN PHYSICAL THERAPY. PROFESSOR CIPOLLARO and DRS. LERNER and KLINE and PROFESSOR McKEE (Department of Radiology).

Section A—10-12 a.m., Monday, Wednesday and Friday.
Section B—2-4 p.m., Monday, Wednesday and Friday.
Section C—10-12 a.m., Tuesday, Thursday and Saturday.
Section D—2-4 p.m., Tuesday and Thursday.

A practical and observational course in the use of the various physical agencies for the treatment of diseases of the skin.

DERMATOLOGICAL ALLERGY AND IMMUNOLOGY. PROFESSOR SULZBERGER and DRS. BAER, G. RUBIN and LEIDER.

1-2 p.m., Thursday, October 9, 1947 through April 8, 1948.

Twenty-four lectures dealing with the theoretical aspects of hypersensitivity and immunity in anaphylaxis, serum sickness, drug reactions, atopic conditions, contact and occupational eczematous manifestations, and bacterial and mycotic affections. Particular attention is paid to the classification of these disorders, the importance of proper history-taking, the various kinds of skin test, and directions for their utilization. Lantern slides and clinical material are used for illustration.

PRACTICAL INSTRUCTION IN DERMATOLOGICAL ALLERGY AND IMMUNOLOGY. DRS. KEIL, G. RUBIN, SCHWARZSCHILD and LEIDER, assisted by members of the technical staff.

Section A—10-12 a.m., Monday, Wednesday and Friday.
Section B—2-4 p.m., Monday, Wednesday and Friday.
Section C—10-12 a.m., Tuesday, Thursday and Saturday.
Section D—2-4 p.m., Tuesday and Thursday.

This is a practical course in the application of the methods of diagnosis and treatment of allergic conditions.

PRACTICAL COURSE IN DERMATOLOGICAL HISTOPATHOLOGY (Part I). DRS. HYMAN and ROTHSTEIN.

Section A—10-12 a.m., Monday, Tuesday, Thursday and Saturday.
Section B—10-12 a.m., Monday, Tuesday and Thursday.

One hour each week is devoted to a lecture illustrated by microscopic slides and the remainder of the time is spent at the microscope. The first eight weeks deal with...
cutaneous histology and elementary histopathology and discussions of laboratory
techniques, and the remaining six months are devoted to the histopathology of the
dermatoses. Matriculates may purchase a representative set of microscopic slides at
nominal cost. (This course is included in the first year of the training for specializa-
tion.)

PRACTICAL COURSE IN DERMATOLOGICAL HISTOPATHOLOGY (Part D).
PROFESSORS JESSNER and SIMS and DRS. MILLER and BIBERSTEIN.
Section A—2–4 p.m., Monday, Wednesday and Friday.
Section B—2–4 p.m., Tuesday and Thursday.
One hour each week is devoted to a lecture illustrated by microscopic slides, and
the remainder of the time is spent at the microscope. The course includes detailed
study of the pathological histology of all the dermatoses, advanced histology, correla-
tion of microscopic and clinical findings, the various staining and fixing methods and
their diagnostic importance, and the daily interpretation of routine diagnostic speci-
mens. (This course is included in the second and third years of the training for spe-
cialization.)

DERMATOLOGICAL THERAPEUTICS. PROFESSOR PASCHER and DRS. EMMET,
SAWICKY and MARKS.
1–2 p.m., Tuesday, January 6 through May 25, 1948.
Twenty-one lectures on general principles of dermatological therapy are discussed,
in detail. The management of the dermatological entities is described in detail and
the rationale of the measures employed is explained. Special phases, such as cosmetics,
dietetics, vitamins and hormones are included. Recent advances in therapy are evalu-
ated.

PRACTICAL INSTRUCTION IN DERMATOLOGICAL THERAPEUTICS. PROFES-
SOR PASCHER and DRS. EMMET, SAWICKY and SILVERBERG.
Section A—10–12 a.m., Monday, Wednesday and Friday.
Section B—2–4 p.m., Monday, Wednesday and Friday.
Section C—10–12 a.m., Tuesday, Thursday and Saturday.
Section D—2–4 p.m., Tuesday and Thursday.
Demonstration of techniques and active participation in the examination, treat-
ment, and follow-up of patients.

MYCOLOGY AND ANIMAL PARASITOLOGY. DR. MONTGOMERY.
4–5 p.m., Tuesday and Thursday, October 7 through November 18, 1947.
Twelve lectures, in which the dermatological diseases caused by pathogenic fungi
and animal parasites are described and demonstrated by means of lantern slides
and clinical material. The methods used for prevention and treatment and for detect-
ing the offending organisms are demonstrated and explained. The newer therapeutic
concepts are stressed.

PRACTICAL INSTRUCTION IN MYCOLOGY AND ANIMAL PARASITOLOGY. DRs.
MONTGOMERY, ROSENFIELD, KADISCH and LOEWENTHAL and
MRS. KARPLUK.
Section A—10–12 a.m., Monday, Wednesday and Friday.
Section B—2–4 p.m., Monday, Wednesday and Friday.
Section C—10–12 a.m., Tuesday, Thursday and Saturday.
Section D—2–4 p.m., Tuesday and Thursday.
The matriculate works in the mycological unit with instructors and technicians,
observing and participating in the preparation, examination, and study of micro-
scopic specimens and cultures, skin tests, use of filtered ultraviolet radiation or
"Wood's light," desensitization, and similar procedures.

PRACTICAL INSTRUCTION IN MINOR DERMATOLOGICAL SURGERY. DRs.
FRANK, AMERSBACH, HYMAN, LARRALDE, PENSKY, KARPELIS and
ROBBINS.
Section A—10–12 a.m., Monday, Wednesday and Friday.
Section B—2–4 p.m., Monday, Wednesday and Friday.
Section C—10–12 a.m., Tuesday, Thursday and Saturday.
Section D—2–4 p.m., Tuesday and Thursday.
The instruction provides experience in the surgical section, with the various pro-
cedures such as scalpel excisions, biopsies, cautery, surgical diathermy, and the use
of cutting current, electrocoagulation and electrodesication. Problems related to
general surgical principles including sterilization, indications and contraindica-
tions, comparative value of surgical and other procedures, and combined treatment,
are discussed in relation to the various dermatoses including benign and malignant new-
growths and the precancerous.

THE EXANTHEMAS AND CERTAIN CONTAGIOUS DISEASES. PROFESSOR
SOBEL.
1–2 p.m., Friday, March 5 through May 21, 1948.
Twelve lectures, illustrated with lantern slides and clinical material, discussing the
epidemiology, clinical manifestations, diagnosis, prophylaxis, prognosis, mor-
bidity and mortality of the following diseases: scarlet fever, measles, rubella,
roseola infantum, chicken-pox, small pox, human cow-pox, vaccinia, Vincent's angina,
anthrax, and leprosy; also the dermatological aspects of diphtheria, typhoid fever,
typhus, cerebrospinal meningitis, mumps, tularemia, and tetanus. There is a complete
review of the quarantine regulations of the New York City Health Department and
of the isolation of cases and contacts both in the home and in hospitals and other
institutions.

HISTORY OF DERMATOLOGY. DR. KEIL.
9–10 a.m., Tuesday, February 3 through March 2, 1948.
Five lectures, dealing with the evolution of the specialty and the principal historical
events connected with skin affections. Illustrated by lantern slides.
COMPREHENSIVE ILLUSTRATED LECTURES ON CLINICAL DERMATOLOGY.

One hundred and fifty lectures covering the diagnosis, characteristics, etiology, histogenesis, pathogenesis, prophylaxis, and treatment of skin diseases. The subjects are divided and presented in convenient categories, including discussion of nomenclature, the primary and secondary lesions of the skin and the topography, description, and distribution of lesions as aids in differentiation. There are series of lectures on the following subjects:

1. Eczematous dermatoses; acneform dermatoses. PROFESSOR SULZBEBGER.
2. Elementary and secondary lesions; rare diseases. PROFESSOR JESSNER.
3. Drug eruptions. DR. BAER.
4. Diseases of the hair and nails. DR. NATHAN.
5. Pyoderma; xanthomas; topography; tuberculodermas. DR. BIBERSTEIN.
6. Bullous eruptions. DR. WACHTEL.
7. Precanceroses and mouth diseases. PROFESSOR SIMS.
8. Dermatoses and peripheral circulation. DR. SAWICKY.
9. Skin diseases in the Negro. DR. SPENCER.
10. Nevi; malignant diseases. PROFESSOR TRAUB.
11. Erythema group. DR. WOLF.
12. Psychosomatic aspects of dermatology. DR. ZAIDENS.
13. Lichens and lichenoid dermatoses; the scaly dermatoses; benign new growths and hyperplasias; atrophies of the skin; acute disseminated lupus erythematosus, dermatomyositis, and periarteritis nodosa.

Several lectures on the practice and theory of dermatology will be given by PROFESSOR EMERITUS MACKEE, and DRS. ROSEN and WISE.

Five lectures on tropical diseases are given by DR. HOWARD FOX (Emeritus Professor of Dermatology, New York University), and the matriculates are invited to accompany PROFESSOR FRANK C. COMBES on his ward rounds at Bellevue Hospital one morning a week.

PRACTICAL INSTRUCTION IN CLINICAL AND MICROSCOPIC DERMATOLOGICAL PHOTOGRAPHY. MRS. MORELAND.

9 a.m.-5 p.m., daily throughout the year, except Saturday afternoon.

INDUSTRIAL DERMATOLOGY. PROFESSOR TOLMACH and DRS. MORSE and KEIL.

9-10 a.m., Friday, October 10, 1947, through January 30, 1948.

Fifteen lectures, dealing comprehensively with the incidence, causes, management and prevention of industrial skin diseases, as well as the conditions conducive to dermatoses in the home, cities, country, and avocations, and the medico-legal and social aspects of industrial skin diseases, and workmen's compensation. In addition to the lectures, three half-days will be spent in industrial plants that manufacture heavy chemicals and in which cutting oil and solvents, synthetic resins and similar substances are used.

SEMINARS

COURSE FOR GENERAL PRACTITIONERS

1219—SEMINAR IN PRACTICAL DERMATOLOGY AND SYPHILIOLOGY. PROFESSORS SULZBEBGER, ABRAMOWITZ, SCHEER, TRAUB, CIPOLLARO, SOBEL and staff.

Five days: September 8-12, 1947. Minimum class, twelve; maximum, twenty. Fee, $55.

Illustrated lectures and clinical demonstrations. Lecture subjects include the following; allergy and mycology in relation to skin diseases; physical therapy in dermatology (exclusive of X rays and radium); industrial skin diseases; eczema group of skin diseases; psoriasis and lichen planus; keloids, warts, and birthmarks; the erythema group of skin diseases; the pyoderma; the alopecias; drug eruptions; tuberculosis of the skin and the tuberculides; the exanthemas and certain contagious diseases; the precancerous dermatoses; cutaneous malignancies; syphilis—its epidemiology, social aspects, etiology, modes of infection, morbidity and mortality, criteria of cure; syphilis and marriage; syphilis in pregnant women; prenatal syphilis; diagnosis, differential diagnosis, and symptomatology of primary, secondary, and tertiary syphilis; congenital syphilis; neurosyphilis; cardiovascular syphilis; visceral syphilis.

A detailed program will be furnished upon request.

COURSES FOR QUALIFIED SPECIALISTS

1210—SEMINAR IN DERMATOLOGICAL HISTOPATHOLOGY. PROFESSORS JESSNER and SIMS and staff.

Five days: May 10-14, 1948. Minimum class, twelve; maximum, twenty. Fee, $75.

A series of lectures, illustrated by selected microscopic slides, reviewing normal histology of the skin and the essential histopathology of most of the diseases of the skin. The lectures are supplemented by study at the microscope and by discussion.
1230—SYMPOSIUM ON DERMATOLOGY AND SYPHILOLOGY (FOR SPECIALISTS). PROFESSORS SULZBERGER, ABRAMOWITZ, SCHEER, TRAUB, CIPOLLARO, SOBEL and staff.

Five days: May 17-21, 1948. Minimum class, twelve; maximum, twenty. Fee $100.

A survey and evaluation of recent advances in dermatology and syphilology, including such subjects as ultraviolet radiation, the new drugs, drug eruptions, new methods of treatment of common skin diseases, new causes for industrial dermatoses; the present conception of eczema, of dangerous nevi, of the diagnosis and management of syphilis, of the lymphoblastomas; and the psychosomatic aspect of dermatology. A presentation of the results of recent research, especially in allergy, in the physics of physical therapy, in cutaneous malignancy, and in biochemistry. A series of illustrated lectures on rare conditions. Demonstrations of patients and of new techniques and methods.

1232—DERMATOLOGY AND SYPHILOLOGY FOR PEDIATRICIANS. PROFESSORS SULZBERGER, ABRAMOWITZ, SCHEER, TRAUB, CIPOLLARO and SOBEL and staff.

Five days: September 29 through October 3, 1947. Minimum class, ten; maximum, twenty. Fee, $75.

Clinic sessions are held from 11-12 a.m. and 2-3 p.m., at which infants, children and young adolescents with a variety of skin diseases are demonstrated, with discussion of etiology, diagnosis, and treatment. Lectures from 10-11 a.m., 1-2 p.m. and 3-4 p.m. cover all skin diseases peculiar to infants and children, in relation to cause, diagnosis, pathology, and treatment. Lectures are illustrated with lantern slides in natural color, charts, blackboard prescriptions, and demonstrations of patients, materials, instruments and therapeutic methods.

Qualified specialists in dermatology and syphilology may also arrange to enroll for special instruction in the individual subjects included in the Course of Training for Specialization, provided there is a vacancy in the class. Information regarding dates and fees will be furnished upon request.

ALL APPLICATIONS AND INQUIRIES SHOULD BE ADDRESSED TO

THE REGISTRAR OF THE SCHOOL
