FACULTY OF THE POST-GRADUATE MEDICAL SCHOOL.

Daniel Bennett St. John Roosa, M.D., LL.D., 60 East 30th Street
Professor of Diseases of the Eye and Ear; Consulting Surgeon to the Brooklyn Eye and Ear Hospital; President of the Faculty.

Andrew Heeremance Smith, M.D., 18 East 45th Street
Professor Emeritus of Medicine; Attending Physician to the Eye and Ear Hospital; Consulting Ophthalmologist to the Presbyterian Hospital.

William Oliver Moore, M.D., LL.D., 21 East 45th Street
Professor Emeritus of Diseases of the Eye and Ear; Ophthalmic Surgeon to the Presbyterian Hospital; Consulting Ophthalmologist and Otolaryngologist to the Presbyterian Hospital.

Bache Merieux Emmet, M.D., 21 East 45th Street
Professor of Diseases of Women; Surgeon to the Woman's Hospital, and to the Columbus Hospital.

Edward Kershner, M.D., 606 East 100th Street
Professor Emeritus of Naval, Military and Naval Hygiene; Medical Inspector U. S. Navy, Retired.

William Henry Porter, M.D., 1624 Broadway
Professor Emeritus of Medicine; Curator of the Freshman Pathology Laboratory to the North-
FRANCIS VALK, M.D.  
Professor of Diseases of the Eye: Ophthalmic and Aural Surgeon to the New York Hospital.

WILLY MEYER, M.D.  
Professor of Surgery, Surgeon to the German Hospital: Attending Surgeon, New York.

HERMANN ST. JOHN BOLDT, M.D.  
Professor of Diseases of Women, Dartmouth Medical School.

WILLIAM JAMES MORTON, M.D.  
Professor of Diseases of the Mind and Nervous System: Neurologist to the New York Infant Asylum.

AUGUSTUS CALLE, M.D.  
Professor of Diseases of Children: Attending Physician to the Babies’ Home, Paediatrician to the German Hospital.

WILLY MEYER, M.D.  
Professor of Surgery, Surgeon to the German Hospital: Attending Surgeon, New York Skin and Cancer Hospital: Consulting Surgeon to the New York Dispensary.

GEORGE MICHAEL EDEBOHLS, M.D., SAMUEL LOYD, B.S.c., M.D.  
Professor of Diseases of Women: Consulting Surgeon to St. Mark’s Hospital, and Surgeon to Beth Israel Hospital.

JOSEPH COLLINS, M.D.  
Professor of Diseases of the Eye: Attending Ophthalmic Surgeon, Bellevue Hospital.

EUGENE FULLER, M.D.  
Professor of Special Surgery (Hernia).

FREDERICK BAGOE, PH.B.  
Professor of Pharmacology.

REYNOLD WEBB WILCOX, M.D., LL.D.  
Professor of Medicine: Consulting Physician to the Nassau Hospital: Visiting Physician to St. Mark’s Hospital.

WILLIAM BURTON DE GARMO, M.D.  
Professor of Special Surgery (Hernia).

DANIEL LEWIS, M.D.  
Professor of Special Surgery (Cancerous Diseases): Surgeon to the Skin and Cancer Hospital.

WILLIAM JAMES MORTON, M.D.  
Professor of Surgery: Attending Surgeon, St. Francis Hospital.

HERMANN ST. JOHN BOLDT, M.D.  
Professor of Medicine: Consulting Physician to St. Mark’s Hospital.

AGUSTUS CALLE, M.D.  
Professor of Diseases of Children: Attending Physician to the Babies’ Home, Paediatrician to the German Hospital.

WILLY MEYER, M.D.  
Professor of Surgery, Surgeon to the German Hospital: Attending Surgeon, New York Skin and Cancer Hospital: Consulting Surgeon to the New York Dispensary.

GEORGE MICHAEL EDEBOHLS, M.D., SAMUEL LOYD, B.S.c., M.D.  
Professor of Diseases of Women: Consulting Surgeon to St. Francis Hospital and to St. Mark’s Hospital, and Surgeon to Beth Israel Hospital.

FRANCIS VANCE, M.D.  
Professor of Diseases of the Eye: Ophthalmic and Aural Surgeon to the New York Hospital.

RAMON GUIJERAS, M.D.  
Professor of Venereal and Genito-Urinary Surgery: Consulting Surgeon to the French Hospital: Visiting Surgeon to the City and Columbia Hospitals.

LEONARD WEBER, M.D.  
Professor of Medicine, Consulting Physician to St. Mark’s Hospital.

HERNIE DULLEA, M.D.  
Professor of Venereal and Genito-Urinary Surgery: Visiting Genetic-Urinary Surgeon to the City Hospital.

JOSEPH COLLINS, M.D.  
Professor of Medicine: Attending Physician to St. Mark’s Hospital.

EDWARD SPARGUE PECK, M.D.  
Professor of Diseases of the Eye: Visiting Ophthalmic Surgeon to St. Elizabeth’s Hospital: Ophthalmologist for the Montefiore Home.

SAMUEL LLOYD, B.S.c., M.D.  
Professor of Surgery: Attending Surgeon, St. Francis Hospital.

ROBERT TULLIE MORRIS, M.D.  
Professor of Surgery.

MARK EINHORN, M.D.  
Professor of Medicine: Physician to the German Dispensary.

FRANK VAN FLEET, M.D.  
Professor of Diseases of the Eye: Surgeon to the Manhattan Eye and Ear Hospital.

GEORGE LIVINGSTON BRODEHEAD, M.D.  
Professor of Diseases of the Skin.

JOHN OSBORNE POLAK, M.D.  
Professor of Surgery: Attending Surgeon to the Harlem Hospital: Assistant Attending Surgeon to Columbia Hospital.

CHARLES WARRENNE ALLEN, M.D.  
Professor of Diseases of the Skin: Consulting Physician to the City and Randall’s Island Hospitals.

CARL BECK, M.D.  
Professor of Diseases of the Skin.

HENRY LING TAYLOR, M.D.  
Professor of Diseases of the Skin.

SIMON BARUCH, M.D.  
Professor of Orthopedic Surgery: Consulting Orthopedic Surgeon to the Tarrytown Island Hospitals.

CHARLES FRANCIS MCKERNON, M.D.  
Professor of Diseases of the Skin: Consulting Physician to St. Mark’s Hospital.

RALPH WALDO, M.D.  
Professor of Diseases of Women: Gynecologist to Lebanon Hospital.

WILLIAM BURTON DE GARMO, M.D.  
Professor of Diseases of the Skin.

JOHN JOSEPH VOGT, M.D.  
Professor of Anaesthetics and Operative Surgery on the Cantonment: Visiting Surgeon to the Harlem Hospital: Assistant Attending Surgeon to Columbia Hospital.

N. Y.  
Professor of Obstetrics.

EDWARD GUNTARD, M.D.  
Professor of Obstetrics.

THOMAS EDWARD SATTSHERWAITE, M.D.  
Professor of Diseases of Women.

CHARLES FRANCIS MCKERNON, M.D.  
Professor of Diseases of the Skin: Consulting Physician to St. Mark’s Hospital.

ADOLPH ZEH, M.D.  
Professor of Diseases of the Skin.

WILLIAM BEDFORD BROWN, M.D.  
Professor of Diseases of the Skin.

JOHN JOSEPH VOGT, M.D.  
Professor of Surgery: Attending Surgeon to the Harlem Hospital: Assistant Attending Surgeon to Columbia Hospital.

CHARLES WARRENNE ALLEN, M.D.  
Professor of Diseases of the Skin: Consulting Physician to the City and Randall’s Island Hospitals.

CARL BECK, M.D.  
Professor of Diseases of the Skin.

HENRY LING TAYLOR, M.D.  
Professor of Diseases of the Skin.

SIMON BARUCH, M.D.  
Professor of Orthopedic Surgery: Consulting Orthopedic Surgeon to the Tarrytown Island Hospitals.

CHARLES FRANCIS MCKERNON, M.D.  
Professor of Diseases of the Skin: Consulting Physician to St. Mark’s Hospital.

RALPH WALDO, M.D.  
Professor of Diseases of Women: Gynecologist to Lebanon Hospital.

WILLIAM BURTON DE GARMO, M.D.  
Professor of Diseases of the Skin.
TWENTY-THIRD ANNUAL ANNOUNCEMENT OF THE

The Post-Graduate Medical School finished the twenty-first year of its existence on the 4th of April of this year. The Directors believe that every year has shown some advance in post-graduate medical instruction. The central idea in their work has been to give personal teaching to the physicians who attend the clinics. Such instruction that they may themselves, in their own practice, do the very things that they have seen done and have participated in doing here.

OBJECTS OF THE SCHOOL.

The school is intended both for specialists and general practitioners. Special tickets are issued for any department of medicine or surgery, according to the table on another page, or tickets involving the whole of the general instruction are furnished. A general ticket with three special tickets added, comprehending instruction in operations on the cadaver and in the Special Classes and work in the Laboratory will enable the general practitioner to avail himself of all the advantages of the School.

CHARACTER OF THE INSTRUCTION.

The teaching of the School is entirely clinical or demonstrative. The hospital accommodations are so ample that practitioners may witness several important operations each day, and also see a large number of patients in the Dispensary, besides the attendance upon clinics. The Professors and Instructors who have patients in the
Hospital are always ready to make their examinations and dressings in the presence of small numbers of the class. Any practitioner may make a request of the Professor for such an opportunity, and he is asked not to wait to be invited, but to make his wants known, not only in this respect, but in all others properly connected with his relations to the Institution.

The practitioner is brought face to face with the patient; and, whenever it can be done, without detriment to the recovery or well-being of the patient, he is allowed to personally examine the case for himself. Bedside instruction also furnishes a prominent feature in this Institution, both in the babies', children's and adults' wards.

PRIVATE INSTRUCTION.

None of the Professors or Instructors in the Post-Graduate Medical School, give private instruction elsewhere in the subjects which they teach in the Institution. Our College is one of private and personal instruction. Whenever necessary the classes are divided into small sections, so that they can be reached by individual demonstration. If any matriculate wishes more than can be found on the schedule for Special courses, or on the general schedule, arrangements can be made to that end by applying to the Secretary.

LABORATORY.

In the Laboratory the most advanced instruction is given in Pathology, Histology and Bacteriology. Besides this, the needs of the general practitioner are carefully attended to in the matter of microscopic examination of urine, the blood and so forth.

ANATOMICAL ROOMS.

Classes in Operative Surgery on the cadaver are continuously formed during the Winter season. There are no such classes from May until October.

THE BABIES' WARDS.

The Babies' Wards occupy two floors in the southwest part of the College and Hospital, containing fifty-seven beds, with a special operating room and everything to make them complete. There is also a roof garden for the benefit of the babies, children and other patients requiring a Solarium.

THE ORTHOPEDIC WARDS.

The Orthopedic Wards occupy a large space, comprising a general ward, with smaller rooms adjacent, accommodating twenty-seven patients. These wards furnish not only relief to a large class of cases, but are also a means of instruction in a most important part of surgery.
TWENTY-THIRD ANNUAL ANNOUNCEMENT OF THE

THE MARGARET FAHNSTECK TRAINING SCHOOL FOR
NURSES OF THE POST-GRADUATE HOSPITAL.

This building, situated at No. 304 East Twentieth Street, immediately opposite the Post-Graduate Hospital, is occupied by our Nurses. The Directress of the Training School is Miss Annie M. Rytieart, who is also Matron of the Hospital.

CERTIFICATES OF ATTENDANCE AT THE MEDICAL SCHOOL.

These are given, for a fee of $5, to each Practitioner, who may attend one or more courses of six weeks, in either the winter or summer term.

CERTIFICATES OF PROFICIENCY.

Certificates of Proficiency will be issued to any Matriculate, who after six months continuous attendance in any course or courses, in the Post-Graduate Medical School, passes a successful examination upon the subjects involved in these courses. The examination will be thorough and aimed to test the candidates’ proficiency. The fee for such an examination will be $25 for each subject, but diseases of the Eye and Ear will require but one fee for the two subjects. This will be also true of Diseases of the Nose and Throat.

REQUIREMENTS FOR ADMISSION.

This School is exclusively for members of the profession whose credentials are satisfactory to the Directors, and who have a legal right to practice medicine in the States or Countries from which they come. Under-graduates are not admitted, on any terms.

WINTER TERM.

The school year is divided into two distinct but continuous terms. The autumn and winter courses begin on October 1st and end on June 1st.

SUMMER TERM.

The School and Hospital are open every day in the year, except Sundays, and legal holidays, during the entire year. The course of instruction and the clinical opportunities in the summer from June 1st to October 1st, will be found to be very satisfactory to those physicians who are not at leisure to attend clinics during the winter.

During the past year over thirteen hundred operations were performed in the Hospital, and 20,151 patients were treated in the Dispensary.

FEES FOR THE WINTER SESSION.

For a general ticket, including all courses and clinics of the School, with exceptions which are mentioned in another paragraph, for a term of twelve months, the fee is $450; for eight months, $350; for six months, $275; for twelve weeks, $150; for a term of six weeks, the fee is $100.

NEW YORK POST-GRADUATE MEDICAL SCHOOL.

FEES FOR THE SUMMER SESSION.

The fee for the general course of the summer session is $45 a month, $60 for six weeks, or $150 for the whole term, from June 1st to October 1st.

SEPARATE COURSES.

When the physician wishes to purchase only tickets for separate courses, the prices are as follows:

<table>
<thead>
<tr>
<th>COURSES NOT INCLUDED IN THE GENERAL TICKET FOR WHICH EXTRA FEES ARE CHARGED.</th>

A Course in Etherization .......................................... 10
A Course in X-Rays .................................................. 25
A Course in Operative Surgery on the Living Subject .......... 30
A Course in Gynecological Operations on the Living Subject .. 30

**How to Get to the Post-Graduate Medical School.**

By the Second and Third Avenue Elevated roads, Eighteenth or Twenty-third Street stations, and the surface roads on Second and Third Avenues, also by the Subway after October 1st to Fourth Avenue and Twenty-third Street.

**What Money to Bring.**

While personal checks or drafts will be taken for tickets, the Directors cannot undertake to cash such checks or drafts for other purposes, until a sufficient time has elapsed for verification. The Directors recommend that Money Orders, Express Orders or drafts on New York, be brought by physicians expecting to spend some time in the City. They can be collected in a very short time, while personal checks sometimes involve many days of delay.

There are numerous houses in the immediate neighborhood of the College in which board will be secured for matriculates on application to the Superintendent. Board may be obtained from $7.00 a week up.

Checks for baggage may be brought to the College as soon as a boarding place has been selected the baggage will be transferred.

**Plan of Instruction.**

**Pathology, Physical Diagnosis, Medical Chemistry, General Medicine and Therapeutics, Climatology, Pharmacology and Hydrotherapeutics.**

**Professors.**

William H. Porter, M.D., Max Einhorn, M.D.,
Stephen S. Burt, M.D., J. Edward Stubbart, M.D.,
Reynold W. Wilcox, M.D., L.L.D., Simon Baruch, M.D.,
Leonard Weber, M.D., Edward Quintard, M.D.,
C. F. Wainwright, M.D.,

**Adjunct Professors.**

Adolph Zeh, M.D., Nicholas R. Dann, M.D.,
Achilles Rose, M.D.,

**Instructors.**

J. Seymour Emans, M.D., Robert H. Halsey, M.D.,
John Weilheimer, M.D., W. P. Worcester, M.D.,
George L. Laporte, M.D., J. L. Blumenthal, M.D.,
John E. MacKenty, M.D., Warren Schoonover, Jr., M.D.,
Harmon Smith, M.D., John E. Kumpf, M.D.,
Philip Embury, M.D., Robert Abrahams, M.D.,
J. G. Wells, M.D.,

**Pathology and General Medicine.**

Professor Porter will give special attention to the etiology, pathology, diagnosis and treatment of the diseases of the alimentary tract, liver, kidneys and general diseases.

**Physical Diagnosis and Medicine.**

At the clinics of Professor Burt, attention will be given chiefly to the topographical anatomy of the thoracic and abdominal viscera, and to the physical signs which are found in health and in disease, including their mode of production and nomenclature.

**Medicine and Therapeutics.**

Professor Wilcox will exhibit patients, illustrating affections of the alimentary, circulatory and respiratory systems, as well as general diseases. Particular attention will be given to differential diagnosis by means of the rational and physical signs and to the treatment to be pursued, the more recent additions to therapeutic resources being carefully considered. The modern treatment of disease will be fully demonstrated.

**Medicine.**

Professor Weber in his clinic will give special attention to constitutional diseases, such as gout, rheumatism, diabetes and so forth, diseases of the blood and ductless glands, such as leukemia, myxedema, anemia,
IS TWENTY-THIRD ANNUAL ANNOUNCEMENT OF THE

Graves' Disease, and so forth. Cases of abdominal tumors will also be shown and examined for diagnosis and treatment. There will be an occasional lecture on Climatology and the Use of Mineral Waters.

SPECIAL COURSES IN DISEASES OF THE STOMACH.

Professor Einhorn will give special courses in diseases of the stomach twice during the season. The first course will begin about October 1st and last for five weeks, two lessons being given by Dr. Einhorn in each week. The second course will begin about April 1st. The class will be limited to six. The lessons will consist of newer methods of diagnosis and treatment of diseases of the stomach. The fee for the course which is not included in the general ticket, will be $40. Professor Einhorn holds a medical clinic one day in the week.

GENERAL MEDICINE AND DISEASES OF THE DIGESTIVE TRACT.

Professor Quintard will discuss under this heading the diagnosis and differential diagnosis of digestive diseases, and suitable cases will be demonstrated in the clinic. The rationale and the most approved treatment of the cases discussed will be indicated in full.

PULMONARY TUBERCULOSIS.

At the clinics of Professor Stubbert special attention will be given to the diagnosis and treatment of pulmonary tuberculosis, and as far as possible the cases will be restricted to those in the incipient and moderately advanced or curable stages. To the class as a whole will be demonstrated, at each clinic, the use of the Roentgen Rays as a corroborative agent in the diagnosis of diseases of the chest.

DISPENSARY TREATMENT OF PULMONARY TUBERCULOSIS.

A Dispensary class is maintained under the charge of Dr. John F. Russell, for the treatment of pulmonary tuberculosis. The patients receive their treatment twice a day at the Dispensary. The Directors invite the attendance of matriculates to this Dispensary that they may see how much may be accomplished for tuberculosis in a large city for patients who have not the means to get away to open air sanitaria. Dr. Russell and his Assistants regulate the mode of life of the patients in their homes by the most careful supervision, and see that they are thoroughly nourished.

HYDRO-THERAPEUTICS.

A course in hydrotherapeutics is given, under the direction of Professor Baruch. The methods of using water in any form of disease to which it is applicable will be thoroughly demonstrated.
Diseases of the Mind and Nervous System, and Electro-Therapeutics

Professors.
Graeme M. Hammond, M.D., William J. Morton, M.D., Joseph Collins, M.D.

Adjunct Professor.
Abbott C. Combes, M.D.

Instructors.
W. P. Wilkin, M.D., Emil Altmann, M.D., G. Alfred Lawrence, M.D., Edwin G. Zabriskie, M.D., William Edgar Deeks, M.D.

The Nervous and Mental Department, including that for electricity, has been extended so that every branch of the subject can be studied to an extent hitherto unequalled. Systematic courses in microscopical anatomy, lectures on general anatomy and physiology, as well as clinical lectures on nervous and mental diseases. Thus, while the clinical lectures and demonstrations, together with electro-therapeutics, are the main features in instruction, full opportunities for advanced students are furnished.

Professor Graeme M. Hammond will give two clinical lectures each week upon diseases of the Mind and Nervous system. These lectures will be illustrated with pathological specimens.

Professor Joseph Collins gives clinical lectures twice weekly. Demonstrations of normal and pathological brains and spinal cords, illustrating localization, etc., are also made. Special students who desire it, will be shown the general methods of microscopical study of the nervous system.

ELECTRO-THERAPEUTICS.

Professor Morton's plan of instruction involves a study of the properties and of the effects upon the human body of the galvanic, the Faradic and Franklinic currents. Electro-diagnosis and the electrolysis of neoplasms fall within its scope, as well as other special procedures, like cataphoric medication and metallic electrolysis. High frequency, high potential currents and their applications will receive careful attention. The use of the X-ray and of radium and other radio-active substances in the treatment of cancer, lupus and other diseases is demonstrated in actual clinical work.

X-Ray Therapy, Fluoroscopy, Radiography.

This course is for the instruction of physicians in the management of X-Ray Apparatus, and its application in therapeutics, fluoroscopy, and radiography. The equipment of the laboratory is complete, and includes a static machine as well as an induction coil, so arranged as to demonstrate all the steps in their fitting up. All the cases in the hospital and dispensary requiring treatment are referred to this department, and an excellent opportunity is afforded to examine all forms of bone lesion, as well as cases of malignant disease. Radiographs are frequently taken, and their developing in the dark-room connected with the department may be studied, and a knowledge of the methods acquired.

The Course is under the direction of Professor Samuel Lloyd, and consists of six lessons. Fee, $25.

The Use of Electrical Machines.

Instructor.
H. E. Waite, M.D.

Dr. H. E. Waite will give instruction in the proper method of using electrical instruments and apparatus.

Surgery.

Professors.
Seneca D. Powell, M.D., LL.D., Willy Meyer, M.D., W. B. De Garmo, M.D., Samuel Lloyd, M.D., Daniel Lewis, M.D., Robert T. Morris, M.D., Carl Beck, M.D.

Adjunct Professors.
Theodore Dunham, M.D., Franz Torek, M.D., Carter S. Cole, M.D., Forbes Hawkes, M.D., Neil MacPhatter, M.D.

Instructors.
George F. Doty, M.D., Charles R. I. Putnam, M.D., Aspinwall Judd, M.D., Edward W. Peterson, M.D., Martin W. Ware, M.D., Benjamin R. Tupper, M.D., A. Bonner, M.D., Frederick J. Haendel, M.D., Wesley G. Vincent, M.D., Jacob Heckmann, M.D., William P. Kingsbury, M.D., Louis Nott Lanehart, M.D., Edward Adams, M.D., Howard C. Williams, M.D., Warren Stone Bickham, M.D.

The clinics and dispensary instruction in this department occupy from three to six hours daily. The material is ample, and nowhere can surgery, in all its departments, be more successfully studied. The constant supply of cases in the Babies' Wards, illustrating the surgery peculiar to babies, is utilized in the clinics every week in the year. There are frequent operations in the special operating room of the Babies' Wards, which are always open to matriculates desiring to witness them.
HERNIA.

Professor De Garmo conducts a special clinic on this important subject. Diagnosis, mechanical treatment, surgical treatment of strangulated and non-strangulated hernia are taught.

CANCEROUS DISEASES.

Professor Daniel Lewis gives clinical instruction upon the Nature and Treatment of Cancerous Diseases.

A COURSE IN ANESTHESIA.

A course of instruction in safe and proper methods of producing anesthesia with ether with a previous inhalation of nitrous-oxid gas, will be given by Dr. Peterson. Classes will consist of two. Fee, $10 for each matriculate.

COURSE IN OPERATIVE SURGERY ON THE LIVING SUBJECT.

This course is given under the direction of Professor Hawkes. Before each operation a few minutes are devoted to the applied anatomy of the parts involved and to the surgical technique which is to be carried out. 

Matriculates work in groups of three. The operations will be performed by them in rotation, under the supervision of Professor Hawkes.

Fee for this course, $30.00 for six lessons.

Orthopedic Surgery.

W. O. PLIMPTON, M.D.,
Henry Ling Taylor, M.D.
Adjunct Professor. 
Instructor.

Charles Ogilvy, M.D.
Edward J. Mountain, M.D.

Orthopedic Surgery, as taught in this department, consists of a combination of surgical with mechanical methods. Every disease and deformity peculiar to this work is presented to the class, including every phase of Spinal and Chronic Joint Diseases, Club Foot, and the various deformities of the extremities due to congenital or acquired causes. There is a machine shop in the school in which practical demonstrations of simple, cheap and effective apparatus and methods will be made. The practitioner will be able to manufacture and apply his apparatus in the towns remote from the great cities, without the aid of the expensive instrument maker, or, by sending measurements and outlines for braces to this department, he can have them made here in the machine shop, and forwarded to him at a very moderate figure. The Orthopedic Ward, with its twenty-seven beds, is included in this department. All who hold the surgical ticket are allowed to be present each afternoon at the Orthopedic Clinics, in the Out-Door Department, with the corps of Instructors, to witness and participate in the dressing and treatment of patients.

Diseases of the Rectum and Anus.

Professor.

SAMUEL G. GANT, M.D., LL.D.
Instructor.

KENNETH KEITH MACALPINE, M.D.

This course meets the constant and increasing demand from all parts of the country for special instruction in Diseases of the Rectum and Anus. The material is abundant, and each matriculate is expected to examine the cases and perfect himself in diagnosis. Students are also taught the value of the proctoscope and colonoscope as a means of diagnosis and treatment, with the technique of operating on Houston's valves.

Department of Surgical Anatomy and Operative Surgery on the Cadaver

Professor.

John J. McGrath, M.D.

Adjunct Professors.

William S. Raines, M.D.,
Denis A. McAllister.

Instructors.

Arthur M. Kane, M.D.,
G. W. Kosmak, M.D.,
A. E. Sellenings, M.D.,
George I. Miller, M.D.,

The operative courses comprise instruction in general, abdominal, genito-urinary, gynecological, ophthalmic, aural and special surgery. The matriculates are divided into groups of four, an instructor being assigned to each group. The members of the class perform individually, in rotation, all the operations of the course chosen.

Diseases of Women.

Professor.

BACHE McE. EMMET, M.D.,
George M. EDEBOHLS, M.D.,
Jonas R. NILSEN, M.D.,
HERMANN ST. J. BOLO, M.D.,
Ralph Waldo, M.D.,
James N. West, M.D.,

Adjunct Professors.

ABRAM BROTHERS, M.D.,
Charles F. Adams, M.D.,
George G. Ward, Jr., M.D.,
Grace Peckham Murray, M.D.,

Instructors.

S. S. GRABER, M.D.,
EMIL A. RUNDQUIST, M.D.,
W. F. Stone, M.D.,
William M. Ford, M.D.,
S. W. BANDLER, M.D.,
Ralph E. Swin, M.D.,
THOMPSON T. SWEENEY, M.D.,
Edward W. Pinkham, M.D.,
Henry Dawson Furniss, M.D.,

Clinics are held daily and operations performed at the School, by one of the Professors or Adjunct Professors. In the general clinics the
largest variety of diseases is exhibited, with ample opportunity to personally inspect the cases.

LIMITED CLASSES IN OPERATIVE GYNECOLOGY.
The Directors have established a complete system of personal instruction in Operative Gynecology. The classes are strictly limited in number, and each member will receive personal guidance in manipulations and operative methods. These classes will be conducted by Professor West. The fee for these classes is $50 for each member. Classes limited to three.

CLINICS FOR WOMEN PHYSICIANS ONLY.
Dr. Grace Peckham Murray, Adjunct Professor of Diseases of Women, has a clinic twice a week, Mondays and Fridays, at 2:30 p.m., at which clinical teaching is given to women physicians only, the clinic being held specially for their advantage, thereby affording them unusual privileges for instruction in the examination, diagnosis and treatment of the diseases of the pelvic organs of women.

Diseases of Children.

Professor.
HENRY DWIGHT CHAPIN, M.D., AUGUSTUS CAILLE, M.D.
Adjunct Professors.
ANDREW VON GRIMM, M.D., CHARLES O. MAISCH, M.D.
Instructors.
CHARLES H. WALKER, M.D., OTTO MAIER, M.D., GODFREY R. PISEK, M.D., H. B. SHEFFIELD, M.D.

Daily clinics are held in Diseases of Children. Professor Chapin will give instruction at the Babies' Wards, and Dispensary where cases exemplifying the various diseases of infancy and childhood are exhibited, special attention being given to diagnosis and treatment. Rickets, syphilis, scrofula, tuberculosis and the diseases accompanied by failure of nutrition in early life, will be shown in large numbers. A short course upon the diagnosis and treatment of the skin diseases of infants and children will be given from time to time. Professor Chapin will devote much attention to the subject of infant feeding, including frequent demonstrations of his simple method of home modification of milk and percentage feeding.

WILLARD PARKER HOSPITAL FOR CONTAGIOUS DISEASES.

Members of the class, in sections, will be occasionally taken to the Willard Parker Hospital, where all the forms of diphtheria and diphtheritic croup will be demonstrated by Professor Henry D. Chapin.

Obstetrics.

Professor.
GEORGE L. BRODHEAD, M.D., JOHN O. POLAK, M.D.
Instructors.
FRANKLIN A. DORMAN, M.D., H. F. DE FOREST, M.D.

Three lectures are given each week by Professors Brodhead and Polak and Dr. Dorman. These are made clinical as far as possible and special attention is given by Professor Brodhead to the various obstetrical operations, with the proper indications for the same. The Lying-in Department offers excellent advantages to those who wish to do special practical work in obstetrics. The following courses in this department are given to small classes, the work comprising all branches of the subject:

1. A general course of two weeks, consisting of:
   Two lessons in operative obstetrics, one in each week. Professor Brodhead.
   Attendance upon all births with the Resident Physician and the Assistant.
   The treatment of puerperal and infants. This will be given upon visits made to post-partum cases.
   Examination of women who are expecting confinement will be carried on by each student, under the direction of Professor Brodhead and Drs. Dorman and De Forest.
   Each matriculate will take personal charge of at least two cases of confinement, under competent supervision.
   The fee for this course is $25.

2. Instruction in the examination of women who are expecting confinement will be given three afternoons of each week for two weeks, the work including abdominal palpitation, auscultation, pelvimetry and vaginal touch. Fee, $10.
3. Two demonstrations upon the manikin, instruction being given by Professor Brodhead in the more common obstetric operations. Fee, $10.
4. Matriculates desiring to witness abdominal cases only, will be called to view four operations on payment of the fee of $20.
5. Two operative cases will be given to matriculates under the supervision of Professor Brodhead, Dr. Dorman or Dr. De Forest. Fee, $20.

**Diseases of the Eye.**

Professors.

D. B. St. John Roosa, M.D., Edward S. Peck, M.D.,
Francis Valk, M.D., A. Edward Davis, M.D.

Adjunct Professor.

P. N. Irwin, M.D.

Instructors.

Ralph Odyke, M.D., J. E. Vibber, M.D.,
Gertrude Allen, M.D., Perry B. Hough, M.D.,
Duncan MacPherson, M.D., W. K. Mittendorf, M. D.,
Ellice M. Alger, M.D., J. A. Hill, M.D.,
Percy H. Frodenberg, M.D.

Clinics in Diseases of the Eye will be held at the School by Professors Roosa, Valk, Peck and Davis and by Adjunct Professor Irwin.

A course of operations on the cadaver will be given at the School by Professor A. E. Davis. Fee, $25.

Special classes of four in Ophthalmoscopy and Ophthalmometry will be conducted by Dr. Hough. Fee, $25.

Evening clinics in Diseases of the Eye will be held at the School by Dr. Frodenberg on Monday and Thursday and Dr. Mittendorf on Tuesday and Friday evenings. Twenty hours a week can be spent by the matriculate in Diseases of the Eye alone.

**Diseases of the Ear.**

Professors.

D. B. St. John Roosa, M.D., Wendell C. Phillips, M.D.,
James F. McKernon, M.D.

Adjunct Professors.

F. N. Irwin, M.D.

Instructors.

Frederick E. Neres, M.D., William A. Randell, M.D.,
Warren C. McFarland, M.D., William S. Bryant, M.D.

Professor Roosa will exhibit and operate upon aural cases in his ophthalmic and aural clinic on Mondays.

Professor Phillips will hold clinics on Mondays and Fridays and Professor McKernon on Tuesdays, Thursdays and Saturdays.

NEW YORK POST-GRADUATE MEDICAL SCHOOL.

In the Summer, the clinic of Professor Roosa will be held by Adjunct Professor Irwin, that of Professor Phillips by Dr. Neres and Dr. Bryant and that of Professor McKernon by Adjunct Professor Rae.

At least thirteen hours a week may be given to the Ear in the clinics and dispensary.

Practitioners attending the Course on the Ear should provide themselves with the necessary instruments for examination, such as aural specula, head mirror, nasal specula, tongue depressor, cotton holders, and so forth, for they cannot be furnished by the school.

**Operative Surgery of the Ear.**

A course on the various operations on the human ear will be given by Professor Phillips. The Classes will be in groups of four; the fee, $50 for each member of the Class. For a lesser number a special arrangement can be made.

A course, fee $25 for each member of the class, will also be given.

The full particulars of these courses may be found under a special description of Surgical Courses on the Cadaver, in a pamphlet furnished by the Superintendent.

**Diseases of the Nose and Throat.**

Professors.

Clarence C. Rice, M.D., H. Beaman Douglass, M.D.

Adjunct Professor.

Thomas J. Harris, M.D.

Instructors.

James B. Ferguson, M.D., Charles Graef, M.D.,
D. B. Sheedy, M.D., R. J. Held, M.D.

Daily clinics are held at the School. The work is very practical, consisting entirely of demonstration of Diseases of the Nose and Throat on patients, with proper medical or surgical treatment for each case carried out in the presence of the student. When qualified, students are allowed to perform some operations under the supervision of a Professor.

**Operative Surgery.**

A course on Operative Surgery of the Nose and Throat, including all operations on the Accessory Nasal Sinuses, Laryngotomy and Tracheotomy, is given on the cadaver by Professor Beaman Douglass. Fee, $50.

Clinics in which practical work may be done by the students are conducted four evenings each week at the School by Drs. Ferguson and Sheedy, special attention being given to "Laryngeal Technique."
Veneral and Genito-Urinary Diseases.

Professors.
W. BEDFORD BROWN, M.D., CHARLES W. ALLEN, M.D.

Adjunct Professors.
ARTHUR H. CILLEY, M.D., FOLLEN CAROT, M.D.

Instructors.
H. G. MACADAM, M.D., COLIN LUKE BREGG, M.D.,

A thorough course is given in this branch of Surgery. Six hours each week are devoted to it on the general schedule. Two courses are given to Operative Genito-Urinary Surgery, at which all the major operations are performed. Some hours are taken up with the exhibition of a large number of cases selected from the School Dispensary, representing interesting features of Veneral as well as Genito-Urinary disease. The differential diagnostic points are then considered in debatable cases, and matriculates are given a chance to ask questions and to make personal examinations. The clinical material which offers itself at the School is far more than is actually necessary for teaching purposes. The Dispensary Clinics of the School are fully accessible to matriculates.

Ample opportunity is given the matriculates for endoscopic and cystoscopic observation together with a chance to study technique of urethral catheterization.

Dr. Henry Garretson Spooner will give instruction in Genito-Urinary Histology and there will be opportunities for research work in this department.

Diseases of the Skin.

Professors.
W. BEDFORD BROWN, M.D., CHARLES W. ALLEN, M.D.

Adjunct Professor.
THURSTON B. LUSE, M.D.

Instructors.
ALBERT D. MAYER, M.D., T. H. MORGAN, M.D.

Clinical lectures on Dermatology will be given twice a week by Professor Brown and Professor Allen. There will also be instruction during the Dispensary hours by Professor Luse and the Instructors. Particular attention is paid to the diagnosis and treatment of Skin Diseases, and the effects of the treatment prescribed for the patient can be observed and followed by the student. Abundant material for instruction is obtained from the Out-Door Department, which is very large, and which is made practical use of in the fullest manner.
