Rev. Annam S. Hewitt.
Rev. S. M. Hamilton.

FACULTY OF MEDICINE.

REV. HOWARD CROSBY, D.D., LL.D.,
Chancellor of the University.

ALFRED C. POST, M.D., LL.D.,
Professor Emeritus of Clinical Surgery; President of the Faculty; Consulting Surgeon to the New York Hospital; Visiting Physician to Presbyterian Hospital.

CHARLES INSLER PARDER, M.D.,
Professor of Pathology and Practice of Medicine; Visiting Physician to the Manhattan Eye and Ear Hospital.

JOHN C. DRAPER, M.D., LL.D.,
Professor of Chemistry.

ALFRED L. LOOMIS, M.D.,
Professor of Pathology and Practice of Medicine; Visiting Physician to Bellevue Hospital.

WILLIAM DARLING, M.D., F.R.C.S.,
Professor of General and Descriptive Anatomy.

WILLIAM H. THOMSON, M.D.,
Professor of Materia Medica and Therapeutics; Visiting Physician to Bellevue Hospital.

J. W. S. ARNOLD, M.D.,
Professor of Physiology and Hygiene.

W. M. POLK, M.D.,
Professor of Obstetrics and the Diseases of Women and Children; Visiting Physician to Bellevue Hospital.

PANHYLE D. WEISS, M.D.,
Professor of Practical and Surgical Anatomy.

LEWIS A. STIMSON, M.D.,
Professor of Pathological Anatomy and Surgeon to Presbyterian Hospital; Curator to Bellevue Hospital.

AMBROSE L. RANNEY, M.D.,
Adjunct Professor of Anatomy.

JOSEPH W. WINTER, M.D.,
Demonstrator of Anatomy.
FACULTY OF THE POST-GRADUATE COURSE.

D. B. ST. JOHN ROOSA, M.D.,
Professor of Ophthalmology; Surgeon to the MANHATTAN EYE AND EAR HOSPITAL.

WILLIAM A. HAMMOND, M.D.,
Professor of Diseases of the Mind and Nervous System.

STEPHENA SMITH, M.D.,
Professor of Orthopedic Surgery; Surgeon to BELLEVUE HOSPITAL.

J. W. S. GOULEY, M.D.,
Professor of Diseases of the Genito-Urinary System; Surgeon to BELLEVUE HOSPITAL.

MONTROS A. FALLEN, M.D.,
Professor of Gynecology; Surgeon to CHARITY HOSPITAL.

HENRY G. PEYFARD, M.D.,
Professor of Dermatology; Surgeon to CHARITY HOSPITAL.

A. B. MACDONALD, M.D.,
Professor of Medical Jurisprudence; Medical Superintendent of the NEW YORK CITY ASYLUM FOR THE INSANE.

JAMES L. LITTLE, M.D.,
Clinical Professor of Surgery; Surgeon to ST. VINCENT'S HOSPITAL.

LECTURERS AND LABORATORY INSTRUCTORS.

LOUIS ELSBERG, M.D.,
Clinical Lecturer on Laryngology and Diseases of the Throat; Physician to CHARITY HOSPITAL.

FREDERICK R. STURGIS, M.D.,
Clinical Lecturer on Venereal Disease; Visiting Surgeon to CHARITY HOSPITAL.

WESLEY M. CARPENTER, M.D.,
Curator of the Museum and Assistant Curator in BELLEVUE HOSPITAL; Laboratory Instructor.

FRANK M. DEEMS, M.D.,
Assistant and Instructor in Chemistry.

MAURICE N. MILLER, M.D.,
Demonstrator of Practical Physiology.

CLINICAL ASSISTANTS.

J. H. HINTON, M.D.,
Assistant to the Professor Emeritus of Clinical Surgery.

FREDERICK R. S. DRAKE, M.D.,
Assistant to the Chair of Practice.

JOHN B. KNAPP, M.D. and P. D. BAGLEY, M.D.,
Assistant to the Chair of Medicine, etc.

ROBERT A. MURRAY, M.D.,
Assistant to the Chair of Obstetrics, etc.

FRANZ NIEHL, Jr., M.D.,
Assistant to the Chair of Surgery.

C. A. H. VON RAMDOHR, M.D.,
Assistant to the Chair of Gynecology.

C. F. B. SCHENEMANN, M.D., and A. B. DEJUSSAC, M.D.,
Assistant to the Chair of Orthopedic Surgery.

WILLIAM J. MORTON, M.D.,
Assistant to the Chair of Diseases of the Mind and Nervous System.

G. R. FOX, M.D.,
Assistant to the Chair of Dermatology.

EDWARD T. ELY, M.D.,
Assistant to the Chair of Ophthalmology.

R. B. BRONSON, M.D.,
Assistant to the Chair of Diseases of the Genito-Urinary System.

WICKES WASHBURN, M.D.,
Assistant to the Chair of Medical Jurisprudence.

W. M. HAYNES, M.D.,
Assistant to the Chair of Pathological Anatomy.

FRANCIS VALE, M.D.,
Assistant to the Chair of Anatomy.

HENRY C. COOPER, Clerk.

ANNUAL ANNOUNCEMENT.

SESSION 1879-1880.

The Faculty of the Medical Department of the University of the City of New York, takes great pleasure in directing the attention of the Alumni and friends of the College, to the marked increase in the number of Students during the past year, and in the number of Graduates at the last Annual Commencement. It is the largest graduating class since the foundation of the College in 1841, and is believed to be the largest class ever graduated at any Institution in the United States. This prosperity is especially gratifying to the Faculty, as it affords indisputable evidence that the course they have followed of adopting at once every improvement in the methods of medical instruction, has received the sanction of the profession. The profession throughout the country has also become convinced of the great clinical and educational advantages offered by the hospitals and public charities of New York, and by their advice students seek the colleges in which these advantages are utilized, for the purpose of completing their education therein. The appreciation of past endeavors leads the Faculty to assure the friends of the College, that unceasing effort will be made to further advance the standard of graduation, and thereby both command and deserve increased success in the future.

THE COLLEGE EDIFICE

Is unsurpassed by any Medical College in the United States. It has its present site directly opposite the entrance to Bellevue Hospital, on Twenty-sixth Street.

The general lecture room will seat five hundred students, and every facility is provided for clinical and didactic instruction. The dissecting room, containing an area of nearly three thousand square feet, has been constructed with especial attention to light and ventilation.

There are three large chemical and physiological laboratories.
UNIVERSITY OF THE CITY OF NEW YORK.

which offer superior facilities for practical study and investigation in these branches. In addition to these there are rooms containing a large museum, recitation rooms, reading and reception room. Ample provision has also been made for the illustration of the use of all modern devices and appliances in the diagnosis and treatment of medical and surgical diseases.

COLLEGE SESSIONS.

The Collegiate Year is divided into three sessions—the Preliminary Winter Session, the Regular Winter Session, and the Spring Session. The latter is supplementary to the former, the design of the Faculty being to furnish instruction to medical students throughout the year. Attendance on the Regular Winter Session is required of each candidate for graduation.

PRELIMINARY WINTER SESSION.

The Preliminary Term commences on Wednesday, Sept. 17, 1879, and continues until the opening of the Regular Session. The Lectures in this Term, both Clinical and Didactic, will be the same in number and order as during the Winter Session, and will be given by the Professors of the Regular and Post-Graduate Faculties. The subjects of the Lectures will be introductory to those of the Regular Course.

REGULAR WINTER SESSION.

The Regular Winter Course commences on Wednesday, October 1, 1879, and continues to the latter part of February, 1880. The system of instruction for the coming Session will be as follows:

Five Didactic Lectures will be given each day in the College building, and will embrace a thorough course in Medicine and Surgery, both elementary and practical. Two Clinical Lectures will also be given each day, one of which will be in the Amphitheatre of either Bellevue or Charity Hospital. The other will be given in the College Amphitheatre, and will be illustrated by cases furnished from the Out-Door Poor Department of Bellevue Hospital, and from the different Dispensaries of the city.

POST-GRADUATE COURSE.

This Course is to consist of Clinical Lectures delivered during the Winter and Spring Sessions by the several professors of the Post-Graduate Faculty, in Bellevue and Charity Hospitals, and in the College. After an attendance of one regular session on these lectures any candidate who is already a graduate of a recognized Medical College can obtain a Diploma Certificate, countersigned by the Chancellor of the University and the Dean of the Faculty of the Medical Department, and by four or more professors of the Post-Graduate Course, to the effect that the candidate has passed an examination by them in their respective branches of special medical instruction. The fee for this Diploma Certificate is $30.

ANATOMY.

Professor Darling will give four lectures each week on General and Descriptive Anatomy. Professor Weisse will give one lecture each week on Surgical Anatomy, and two evening demonstrations of recent dissections.

The study of Practical Anatomy will be prosecuted in the Dissecting Room from the beginning of the preliminary term until the middle of May; the department will be under the personal supervision of Prof. Weisse.

Arrangements have been made for a renewal of the abundant supply of dissecting material of last winter; and, as heretofore, it will be furnished free of charge.

MORBID ANATOMY.

Students of the University will have free access to the Post-mortem Rooms of Bellevue and Charity Hospitals, where examinations are made daily by the Curators or their assistants.

The large number of Coroner's cases afford illustrations of topics relating to Medical and Surgical Jurisprudence. Coroner's Inquests are also made from time to time before the class.

SURGERY.

It is with sincere regret that the Faculty announces the death of their lamented colleague, Dr. John Thomson Darby. By the transference of Professor Wright to the Surgical Department, in which he first became connected with the University, a tried and successful instructor in this important branch is secured. Professor Wright will give three didactic lectures and one clinical lecture each week in the College building.

Professor Post will hold a weekly Surgical Clinic in the College building.
UNIVERSITY OF THE CITY OF NEW YORK.

PRACTICE OF MEDICINE AND PATHOLOGY.

In addition to three Didactic Lectures and one Clinical Lecture given in the College building, Professor Loomis will organize a Diagnosis Class, to be held in the Amphitheatre of Bellevue Hospital, on Tuesday of each week, when students will examine patients and make diagnoses before the class.

MATERIA MEDICA AND THERAPEUTICS.

Professor Thomson, in addition to the Didactic Lectures of his course, will give two Clinical Lectures each week, one in Bellevue Hospital, and one in the College building.

In this course special attention is directed to those Remedial Agents which are not Medicines, and the action of Medicines Proper with particular reference to their practical application.

OBSTETRICS AND DISEASES OF WOMEN AND CHILDREN.

The Faculty take pleasure in announcing the appointment by the Council of the University, of Professor W. M. Polk, to the Chair of Obstetrics and Diseases of Women and Children.

Professor Polk will give three Didactic Lectures on Obstetrics, and one Clinical Lecture on Diseases of Women and Children each week, in Bellevue Hospital. All of the principal Obstetric operations will be performed on the cadaver before the class. Members of the Graduating class will be provided with cases of midwifery, of which they take the entire control, unless complications arise, when the Professor, or his assistants, will aid them and suggest the proper treatment.

CHEMISTRY.

Professor Draper will give three lectures each week. The earlier portion of the course will be devoted to the consideration of heat, light, and electricity, the latter portion to inorganic and organic chemistry. Throughout the entire course the experimental illustrations will be numerous, and the relations of these subjects to practical medicine will receive especial attention.

PHYSIOLOGY AND HISTOLOGY.

Professor Arnold will give three lectures each week, illustrated by a full series of experiments, consisting of vivisections, enlargements on the screen with the stereopticon, the photo-electric microscope, the megascope, etc. The circulation and heart's action will be demonstrated by means of Marey's apparatus, or the graphic method. Suitable instruments will be employed for illustrating the physiology of the nervous system. Chemical and mechanical problems in their physiological bearings will receive marked attention.

SPECIAL BRANCHES.

OPHTHALMOLOGY AND OTOLGY.—Prof. Roosa and Pardee will give one Clinical Lecture each week on these subjects, at which they will perform the principal operations in Ophthalmic and Aural Surgery in presence of the class.

DISEASES OF THE MIND AND NERVOUS SYSTEM.—Professor Hammond will give one Clinical Lecture on these subjects each week in the College building, at which he will illustrate the application of electricity to the treatment of Nervous Diseases.

ORTHOPEDIC SURGERY.—Professor Smith will give, in Bellevue Hospital, a Clinic on this subject each week during the Winter Sessions.

DISEASES OF THE GENITO-URINARY SYSTEM.—Professor Gouley will give, in Bellevue Hospital, a Clinic on this subject each week during the Winter Sessions.

CLINICAL SURGERY.—The Faculty is pleased to announce the appointment as Clinical Professor of Surgery, of Professor James L. Little. Prof. Little will give a clinical lecture every week until December 1, 1879.

VENEREAL DISEASES.—Dr. Sturgis will hold a Weekly Clinic on Venereal Diseases, in Charity Hospital, after December 1, 1879.

GYNAECOLOGY.—This Clinic, the first of its kind ever given in the United States, was established in the University by the late Professor Gunning S. Bedford, in the year 1856. It will be conducted during the coming Sessions by Prof. Pallen, as a Weekly Clinic, in the College building, at which operations will be performed before the class.

DERMATOLOGY.—Professor Piffard will give a Clinical Lecture each week in the College building.

PATHOLOGICAL ANATOMY.—Professor Stimson will give one lecture each week. The course will cover the principal pathological changes in all the tissues and organs. It will be illustrated by means of prepared specimens and fresh material obtained from the hospitals. Especial care will be taken to bring forward prom-
ently those changes which are of most importance in diagnosis and rational therapeutics. Private instruction will be given, in the Pathological Laboratory, to those students who may desire to become practically familiar with this subject.

**PRACTICAL INSTRUCTION.**

As a thorough knowledge of the different branches of medicine is only to be attained by personal attention to the same, the Faculty has for many years endeavored to give facilities for the establishment of courses similar to those enjoyed by Dissecting-room Classes. With this object in view, in addition to the dissecting-room, a working-laboratory for instruction in Chemistry and Physiology has been arranged. The Professors of Chemistry and Physiology are thus enabled to give practical instruction in their respective branches to such as may desire it. The College Clinics, and the wards of Bellevue and other Hospitals, in like manner afford similar opportunities for the study of disease, so that instruction on all special branches is amply provided for. Students can thus avail themselves of the knowledge of specialists in each branch of medicine, and it is worthy of record that the majority of the members of the Graduating Classes thus gain a practical knowledge of Urinary Analysis, Clinical Microscopy, Physical Diagnosis, together with Surgical and Obstetrical Operations.

**FACULTY EXAMINATIONS.**

The daily examinations, conducted by the members of the Faculty during the past three years, having been followed by the most gratifying success in elevating the standard of preparation in the Graduating Class, the Faculty has decided not only to continue these examinations, but also to urge upon the students of the College the necessity and propriety of a close attendance on the same. The examinations in question are based on the Lectures and Clinics given by the Faculty during the regular and spring sessions, and that there may be no excuse for non-attendance, they are offered free of expense to the students of the College.

**CLINICAL INSTRUCTION IN HOSPITALS AND HOSPITAL APPOINTMENTS.**

The site of the College, so central with reference to the great hospitals, and the positions held by Members of the Faculty therein, enables the Faculty to give due prominence to the clinical instruction which was first established in America in this institution by its late eminent Professor of Surgery, Dr. Valentine Mott. Besides the stated clinics in the College building, clinical instruction will be given daily by different Professors of the College in the following Institutions. A ticket is furnished by the Faculty of the University to each student, which entitles him to spend several hours daily in these hospitals.

**Bellevue Hospital,** immediately opposite the University, receives more medical cases than any other hospital in the country. About seven thousand patients are treated annually, and all forms of diseases and injury can be studied in its wards. All the clinics held in the hospital are open to University students daily, and important surgical operations are performed in its Amphitheatre. Twelve Junior Assistants are appointed by competitive examination each year.

**Charity Hospital,** on Blackwell's Island. The ferry is a few steps from the University, the passage and entrance ticket is furnished by the Faculty. This hospital contains eight hundred patients. It is a capital field for the study of syphilitic disease, in males and females, also genito-urinary and uterine diseases. It has a large obstetric service. Several of the University Instructors are connected with this hospital, and students have every facility for study and examination. Twelve Junior Assistants are appointed by competitive examination each year.

In addition to these there are under the control of the Commissioners of Public Charities and Correction, and accessible to
students, the Fever and Small-Pox Hospitals, the hospital for Epileptics and Paralytics, the Nursery Hospital, the Insane Asylum, and the Bureau of Relief for the Outdoor Poor. This last is opposite the University Medical College, on Twenty-sixth Street, and can be visited by its students every day.

The Roosevelt Hospital, in Fifty-ninth Street; the Presbyterian Hospital, in Seventy-third Street, and the New York Hospital, in Fifteenth Street, are also open to the students of the University.

Besides the above advantages, the students of the University have access to the Manhattan Eye and Ear Hospital, of which Profs. Roosa and Pardee are Surgeons, and where 2,500 new patients are treated annually, and over 500 operations performed.

Students of the University can apply for positions on the resident staff of any of the above-mentioned hospitals, and also of the St. Vincent's, Mt. Sinai, St. Luke's, the Children's, and the Woman's Hospitals; the Lying-in Asylum, the Colored Home, the Manhattan Eye and Ear Hospital, and the Emigrants' Hospital.

**MOTT PRIZE MEDALS.**

By the will of the late Dr. Valentine Mott, a founder of this College, and for many years its President and Professor of Surgery, perpetual provision was made for the following medals:

- A gold medal to the candidate who shall prepare the best dried anatomical or anatomico-surgical preparation.
- A silver medal to the second best of that description.
- A bronze medal to the candidate who shall furnish the best book of recorded cases and remarks of the Professor of either of the Surgical Clinics.

Candidates for graduation, as well as first and second course students, may compete for these medals.

The preparation shall belong to the University Mott Prize Museum, and be labelled with the name of the maker.

The volume of cases shall also belong to and be deposited in the Museum.

The medals to be announced by the Chancellor, and presented to the successful candidates, at the Spring Commencement of the College.

The medals not to be awarded except the specimens presented are of sufficiently good character.

**MEDICAL DEPARTMENT.**

These prizes were awarded at the last Commencement as follows:

- The gold medal to W. R. Winters, of New Jersey.
- The silver medal to Gregory Iskiyan, of Turkey.
- The bronze medal to E. R. Boden, of New York.

**FACULTY PRIZES FOR PUBLIC COMPETITIVE EXAMINATIONS.**

The following Prizes will be awarded, at the February Commencement, to members of the Graduating Class.

1. The Faculty prize of one hundred dollars to the Candidate who has received the highest marks in the examination for the degree of Doctor of Medicine.
2. Prize for the best examination in Pathology and Practical Medicine.
3. Prize for the best examination in Materia Medica and Therapeutics.
4. Prize for the best examination on Physiology.
5. Prize for the best examination in Obstetrics.
6. Prize for the best examination on Chemistry.
7. Prize for the best examination on Surgery.
8. Prize for the best examination on Diseases of the Eye and Ear.

With the exception of the examination for the first prize, these examinations will be held in public at the close of the Lecture Term, and the award made by Committees appointed from the Alumni Association. Candidates for these prizes must have secured the highest marks of the Professors who examine on these subjects in the stated examinations for the College Degree.

Prizes were awarded last year as follows:

- The Loomis Prize, to J. C. McCoy, of Delaware.
- The Thomson Prize, to E. E. Wallace, of New York.
- The Wright Prize, to W. J. Herriman, of New York.
- The Roosa Prize, to W. T. Smith, of New Hampshire.
- The Hammond Prize, to E. Walker, of Indiana.

**REQUIREMENTS FOR GRADUATION.**

Candidates for the degree of Doctor of Medicine must have attended two full courses of Lectures—the latter in this College. They must have studied medicine three years, under the direction of a regular physician or surgeon, and have attained the age of twenty-one years. Each candidate is required to write a medical
thesis, and to deposit it with the Dean of the Faculty. Full certificates of the time of study, of age, and of moral character, must also be furnished.

He must pass examinations separately before the Professors of Surgery, Chemistry, Practice of Medicine, Materia Medica, Anatomy, Physiology, and Obstetrics.

Two Commencements take place annually in the University, at either of which the candidates who have complied with the above requirements may graduate. The first is at the close of the winter, the second at the close of the spring session.

With a view to the establishment of a systematic, graduated scheme of tuition, students who have attended two full courses of lectures, and who have completed two years of study, may be admitted to examination in Chemistry, Anatomy, and Physiology, and, if successful, will be examined, at the expiration of their full course of study, on Practice, Materia Medica and Therapeutics, Surgery and Obstetrics; but those who prefer it may have all their examinations at the close of their full term.

ROYAL COLLEGE OF SURGEONS OF ENGLAND.

In accordance with the requirements of this College, students who desire to obtain the diploma, must pass satisfactory examinations—prior to the beginning of professional study—on the following subjects:

English Language, including Grammar and Composition. Arithmetic, including Vulgar and Decimal Fractions. Algebra, including Simple Equations. Geometry, First Two Books of Euclid. Latin Translation and Grammar. In addition to the above, one of the following optional studies: Greek, French, German, and Natural Philosophy, including Mechanics, Hydrostatics, and Pneumatics.

The rule applies to the Students of all Medical Colleges that do not require a preliminary examination, except the candidate has the degree of A.B. from a recognized College. Students who desire this examination must present their names to the Dean during the first two weeks of the Regular Term. The examinations will be conducted by the Faculty of the Department of Arts in the University.

FEES FOR THE WINTER SESSIONS.

Matriculation Fee, $5.
with Daily Recitations, thus affording efficient and systematic instruction to the advanced student as well as to the beginner. Recitations will be held daily by the Professors in the College building; these Recitations will embrace Surgery, Anatomy, Practice of Medicine, Physiology and Histology, Chemistry, Materia Medica, and Obstetrics. Lectures will be given daily by the Professors of the Post-graduate Faculty. Two Clinical Lectures will be given daily, either at Bellevue or Charity Hospitals, or the Manhattan Eye and Ear Hospital. The Dissecting-Room will be open during the first two months of the Session. The Chemical, Microscopical, and Physiological Laboratories will be open during the Session for practical instruction in those branches.

This course begins in the first week of March, and ends the latter part of May.

Students who have attended the Winter Course of Lectures will be admitted to the Spring and Summer Course, free of charge, except the matriculation fee. Those who have not attended the Winter Course will be admitted on payment of the matriculation fee and $30; and, should they decide to become pupils of the University for the Winter Course ensuing, the $30 thus paid will be credited to them on taking out their tickets for that course. The student will therefore gain in this manner three months' instruction free of cost.

Full particulars concerning the Spring Session will be given in the usual Circular, which will next be issued in the month of January, 1880.

BOARDING.

The expenses of living in the City of New York have heretofore deterred many medical students from availing themselves of the great clinical advantages offered by the Faculty of the University.

Arrangements have now been made by the Dean so that each matriculant of the College will be furnished with good board, including room-rent, at a convenient distance from the College building, at the very low rate of $8 per week. The Clerk has positive instructions to furnish boarding-houses to none except matriculants in the University.

For further particulars, address

CHARLES DUSKEE PARDEN, M.D., Dean,
University Medical College, 410 E. 26th Street,
NEW YORK CITY.
